ILLINOIS CROP REPORT

: : FOR : :

MAY 1, 1899.

Synopsis of the Reports of Correspondents Upon the Acreage and
Condition of the Growing Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,
SPRINGFIELD, May 1, 1899.

The information contained in this circular was obtained from the reports of correspondents mailed to this office the first of May.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past twenty-three years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number nearly six hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WINTER WHEAT.

The severely cold weather of part of February was very disastrous to wheat, which up to that time had been quite promising. There was very little snow to protect the plant, and as soon as the weather was warm enough for the wheat to grow, the injury became apparent, and the latest advices are to the effect that over one-half of the area seeded last fall, 51 per cent., or 1,033,124 acres, was either entirely destroyed or so badly injured that it will be plowed up and put in oats or corn.

While the largest proportionate area, 79 per cent., was destroyed in the northern division of the State, the winter wheat raised in this portion of Illinois is so insignificant, that it has very little effect on the total product.

In central Illinois 65 per cent. of the area seeded was destroyed, leaving but 362,859 acres for harvest.

169208

CROP REPORT.

A little more favorable state of affairs prevails in the southern grand division, where but one-third of the area was destroyed, leaving 633,324 acres for harvest.

The total area for harvest is 1,006,567 acres.

In northern Illinois the May condition of wheat, 32 per cent., is the lowest ever reported.

In central Illinois the condition of 52 per cent. is the lowest ever reported at this date, except in 1897, when it was but 48 per cent. of a seasonable average.

Although the May 1 condition of the crop in the southern division of the State is not so good as last year, it is much better than in other sections, and it is believed that 71 per cent. of an average crop will be harvested on the area left.

In Richland, Saline and White counties chinch bugs are reported in the wheat, but little or no damage has been done by them as yet.

Taking the State as a whole, the May 1 condition is 52 per cent. of a seasonable average.

SPRING WHEAT.

There is a deficiency of 5 per cent. in the area devoted to spring wheat this year, as compared with 1897, when 46,242 acres were reported. No reports on this crop were received from the central and southern grand divisions, but the majority of the counties in northern Illinois grow this crop.

The May 1 condition is 93 per cent. of a seasonable average.

OLD WHEAT.

Although a larger quantity of old wheat is in first hands at this date than on May 1, 1898, the amount reported, 1,635,451 bushels, is much below the average, which is a little over four million bushels. The percentage of last year's crop remaining in the producers' hands on May 1, is 9 per cent. of the 1898 crop.

A small surplus of wheat was raised last year over the needs of the population, but it is doubtful whether more than enough for seed will be produced in Illinois this year.

The following table gives the amount of old wheat in first hands the first of May, since and including 1880:

YEAR PRODUCED.	Crop in bushels.	Per cent. crop on hand following May 1.	Amount crop in producers' hands following May 1.	Surplus wheat above seed and consumption at harvest.	Deficit at harvest.
1880.....	56,508,309	15	8,476,246	39,851,883
1881.....	22,374,163	13	2,924,039	5,765,414
1882.....	52,323,261	15	8,174,634	36,214,133
1883.....	20,374,572	15	3,208,358	4,575,152
1884.....	34,367,493	18	6,350,202	17,367,794
1885.....	8,299,243	14	2,201,904	5,439,786
1886.....	28,284,068	15	4,000,931	12,082,999
1887.....	38,076,468	13	5,034,875	21,842,119
1888.....	33,916,920	12	4,022,569	17,334,947
1889.....	37,201,916	15	5,722,594	20,919,433
1890.....	13,608,504	12	1,580,903	2,002,400
1891.....	34,620,828	17	5,563,995	16,853,536
1892.....	30,578,543	18	5,428,060	13,086,069
1893.....	18,916,314	14	2,657,854	891,488
1894.....	41,315,099	13	5,512,379	23,288,962
1895.....	18,093,503	10	1,813,244	169,992
1896.....	21,514,531	9	2,012,437	3,683,784
1897.....	10,255,525	8	843,892	7,600,394
1898.....	18,383,943	9	1,635,451	563,474
Average.....	28,369,118	14	4,661,556	14,665,699	5,014,193

RYE.

Forty-three per cent. of the area seeded to rye last fall was winter-killed, a somewhat better showing than for wheat, though in some localities this plant suffered most, having been planted later, and therefore not getting so good a start. In northern Illinois the amount winter-killed was 50 per cent., in central Illinois 26 per cent., and in the southern division of the State, 21 per cent.

The area of rye left for harvest is 61,088 acres, of which 39,342 acres are in the northern division of the State, 16,988 acres in the central division, and 4,758 acres in southern Illinois.

The May 1 condition of rye is 71 per cent. of a seasonable average in northern Illinois, 79 per cent. in central Illinois, and 83 per cent. in the southern division, the State condition being 78 per cent.

OATS.

Owing to the destruction of much of the winter wheat, it was expected that a largely increased area of oats would be seeded this spring, but the unfavorable weather prevented this to some extent, so that instead of an increase over the 1898 area, there is a deficiency of 3 per cent., taking the entire State into consideration. In northern Illinois, however, there is an increase of 4 per cent. over last year, and in central Illinois 3 per cent., the deficiency in the southern division being 16 per cent.

In DeKalb county a large area was seeded to oats which will be cut for hay.

The May 1 condition of oats in northern Illinois is 92 per cent. of a seasonable average; in central Illinois it is 90 per cent., and in the southern division 91 per cent., the condition for the entire State being 90 per cent.

BARLEY.

Nearly as much barley was planted this spring as last, the area being but 1 per cent. less. The May 1 condition of the crop is 94 per cent.

CORN.

But 68,695,412 bushels of corn were reported in producers' hands on May 1, 1899, this being 32 per cent. of the 1898 crop. While this is considerably less than has been reported for the three preceding years, it is still above the average.

In the northern division of the State 37 per cent., or 38,518,098 bushels are reported in first hands; in the central division 29 per cent., or 23,715,460 bushels, and in southern Illinois 22 per cent., or 6,461,854 bushels.

The following table gives the amount of old corn in the producers' hands May 1, the past twenty years as well as the extent of the crop produced each preceding year:

YEAR PRODUCED.	Crop in bushels.	Per ct corn on hand fol- lowing May.	Bushels corn in producers' hands foll w- ing May.
1879.....	305,913,277	32	99,229,889
1880.....	250,697,036	28	71,929,343
1881.....	174,491,706	21	37,445,964
1882.....	179,471,729	24	43,450,857
1883.....	186,583,558	21	39,478,621
1884.....	207,556,662	24	50,102,264

Average.....	213,880,899	30	64,940,885

MEADOWS.

Clover meadows suffered very severely from the cold winter, and in many cases the plant is entirely killed, or so badly injured that it will be plowed up, thus reducing the meadow area very materially. This is especially true of the northern division of the State, where the area is 23 per cent. less than in 1898, and the May 1 condition is but 73 per cent. of a seasonable average.

In central Illinois the area is 11 per cent. less than last year, and the condition 83 per cent.

In the southern division but little damage was done and the 1899 area is but 2 per cent. less than last year, while the May 1 condition is 95 per cent.

The old clover suffered most, that often being killed where last year's seeding was scarcely injured. Timothy and other grasses were not much injured as a rule.

PASTURES.

A very favorable condition of pastures is reported from all over the State this year. In northern Illinois the area is 93 per cent. as compared with last year, in central Illinois it is 91 per cent., and in the southern division of the State 98 per cent.

The May 1 condition of pastures is 81 per cent. of a seasonable average in the northern division, 89 per cent. in the central, and 95 per cent. in the southern division. The comparatively low condition in the northern and central divisions arises rather from the fact that lateness of the season has retarded the growth of the plant, than from any injury it has received. Pastures were badly winter-killed in DeKalb county, with some injury in other counties.

SPRING WORK.

The late season has retarded spring work greatly, and less than half, 47 per cent., of the usual amount was done up to May 1.

About the same amount of plowing has been done all over the State, the proportion in northern Illinois being 48 per cent. of an average, in central Illinois 49 per cent., and in the southern division 45 per cent.

The condition of the soil is only a fair average, as in some places it breaks up unusually well, and in others it is tough and cloddy.

LIVE STOCK.

HORSES.

Very little disease among horses occurred during the past few months. There has been some distemper in Bureau, Kankakee, Edgar, Ford, Menard, Jasper and Richland counties, and spinal meningitis is reported from Pope, Franklin and Carroll counties. In Grundy county there has been some catarrhal fever, and horses have been affected with unknown diseases in the counties of Mercer, Will, Calhoun, Hardin and Johnson, while blind staggers is reported from Randolph and Franklin counties.

The number of horses in the State this year as compared with 1898, is 92 per cent. in northern Illinois, 91 per cent. in central Illinois, and 93 per cent. in the southern division of the State, and their May 1 condition is 98, 96 and 94 per cent. respectively.

MULES.

In the northern division of the State the number of mules is 4 per cent. less than last year; in central Illinois the deficiency is 7 per cent., and in southern Illinois 11 per cent.

The May 1 condition of mules is 99 per cent. in northern Illinois, and 97 per cent. in each of the other grand divisions.

CATTLE.

In northern Illinois the number of cattle as compared with 1898 is 96 per cent., in central Illinois 90 per cent. and in the southern division of the State 92 per cent. In DeKalb and Winnebago counties cattle are being sold off pretty closely on account of lack of pasture.

Nearly an average condition prevails among cattle at this date, 96 per cent., though a little sickness has been reported. In Coles and Bond counties there has been some big jaw among feeding cattle, and in Lake county a good many calves have had the scours. Some pink-eye is reported in Jefferson county.

DAIRY COWS.

Little change is noted in the number of dairy cows kept this season, there being 98 per cent. as compared with 1898 in northern Illinois, 96 per cent. in central Illinois, and 95 per cent. in the southern division of the State.

Their condition on May 1 was nearly up to an average, 96 per cent. The only disease reported among them was in Will county, where there has been a good deal of sickness.

HOGS.

The cholera keeps the number of hogs in the State down, and this spring the deficiency as compared with last year is 12 per cent.

While there has been some loss of hogs this year, their May 1 condition is 96 per cent. of a seasonable average.

The cold weather was very hard on early pigs, and a good many were lost on that account, this being the case in Mercer, Cumberland, Douglas, Morgan and Piatt counties. Cholera is reported from Clay, Sangamon, Moultrie, Morgan, Montgomery, Fulton, Adams, Warren and Bureau counties.

SHEEP.

A deficiency of 5 per cent. in the number of sheep this year as compared with 1898 is reported, the proportion in the northern division of the State being 98 per cent., and in the central and southern portions 93 per cent.

The May 1 condition of sheep is nearly a full average, being 98 per cent. in northern and southern Illinois, and 96 per cent. in the central division of the State.

In Douglas county many lambs were lost on account of the cold weather, and in Lake and Wayne counties some sheep are dying. In Bond county sheep are in the poorest condition known in years.

BEES.

As a rule bees wintered very poorly, a large proportion of them being killed either by the severity of the winter, or by starvation.

FRUIT.

The fruit prospect is excellent for some fruits and very poor for others. At this time, May 1, it looks as if there would be the largest apple crop ever raised in Illinois, but there will be practically no peaches. While a few blooms appeared upon the trees in some localities, if every one should mature there would not be enough to count, and generally there were no blooms. In many cases the trees are killed to the ground, as well as the buds. The seedling peaches seem to be able to withstand the cold better than the budded varieties, as in a number of counties the former are reported as blooming, while the latter are killed. In Henderson county the plum trees are reported killed, and cherry trees in Jasper and Williamson counties.

Grape vines are said to be killed in Jo Daviess, Kane and Williamson counties, and are badly injured elsewhere.

Among the small fruits, the least encouraging reports are those on blackberries, which promise to be almost as much of a failure as peaches, but raspberries, strawberries, gooseberries and currants were all more or less injured.

ADDITIONAL FARM NOTES.

Little change is noted from year to year in farm methods, but the following are among the new methods reported by our correspondents in their respective localities: In Grundy county screenings are being fed to sheep and oil cake to hogs. On account of the increased use of improved machinery, younger farm hands are employed than formerly. In Brown county farmers are using crushed corn for cattle and cooked corn for hogs. In Mason county the cultivation of sugar beets, and the presence of a canning factory will make some changes in farming in that county. A good many

sugar beets will also be planted in Tazewell county. There will be an increase in the area devoted to small fruits and truck gardens in Franklin county this year. Beets and artichokes are raised to some extent in Jasper county for feeding stock, and in Johnson more stock peas will be raised this year than usual. The largest area of tomatoes and melons ever known is being planted in Union county, where a great many cow peas are raised, which are fed off the field to hogs.

WAGES PAID FARM HANDS.

There is quite a deficiency in the supply of farm hands in northern Illinois this year, only 90 per cent. being reported. In central Illinois there is 97 per cent. of the usual number, and in the southern division 95 per cent.

The wages paid farm hands vary very little from year to year.

The average wages paid farm hands during the past twenty years in the three grand divisions of the State, are given in the following table:

DIVISION.	PER DAY.		PER MONTH.	
	With board.	Without board.	With board.	Without board.
Northern	\$1 00	\$1 25	\$19 55	\$27 35
Central.....	85	1 10	17 80	24 35
Southern.....	65	90	14 40	20 45
Average.. ..	\$0 85	\$1 10	\$17 25	\$24 05

The wages paid farm help in the three divisions of the State, during the past twenty years, is given in the following tables:

NORTHERN DIVISION.

YEAR.	PER DAY.		PER MONTH.	
	With board.	Without board.	With board.	Without board.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value

of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent., is recorded 110; a decrease of five per cent. is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,
Secretary.

ILLINOIS CROP REPORT

:: FOR ::

JUNE 20, 1899.

Synopsis of the Reports of Correspondents Upon the Acreage and Condition of the Growing Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,
SPRINGFIELD, June 20, 1899.

The information contained in this circular was obtained from the reports of correspondents mailed to this office the twentieth of June.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past twenty-three years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number nearly six hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

CORN.

Owing to the destruction of the wheat, the corn area is slightly larger this year than in 1898, being 5 per cent. larger in northern Illinois and 1 per cent. in central Illinois, no increase being reported from the southern grand division. The total area planted to corn this season is 7,126,786 acres, an increase over last year of 182,794 acres.

The spring was so wet and cold that planting was delayed very materially in some sections, and the June 20 condition is scarcely so good as usual. In the northern division of the State it is reported as 88 percent. of a seasonable average; in the central division as 79 per cent., and in the southern division as 86 per cent.

The seed used this year is considerably below standard in quality, being but 81 per cent. of an average. This also operates against the crop, as much of the seed failed to generate, making replanting necessary. The plant came up very unevenly,

the date of first appearance above ground ranging from April 1 in Gallatin county, to May 22 in Mercer county.

Some complaint of chinch bugs has been made, but as yet they have done no serious damage to the crop. Wire worms, cut worms, corn root worms and ants are also reported as working on the corn, but the effects of their work will be more evident later in the season.

BROOM CORN.

Taking the entire State into consideration, the area devoted to broom corn this season is the same as last year, when 23,976 acres were reported. In the northern division there is a deficiency of 7 per cent.; in the central division an increase of 5 per cent. and in the southern division an increase of 2 per cent.

The June 20 condition of the crop in northern Illinois is 91 per cent. of a seasonable average; in central Illinois 88 per cent., and in the southern division, 97 per cent.

SORGHUM.

A smaller area than was planted to sorghum in 1898 by 9 per cent. is reported this year, the deficiency in northern Illinois being 8 per cent., in central Illinois 11 per cent., and in the southern division 9 per cent.

The June 20 condition of the crop is but 92 per cent. of a seasonable average in northern Illinois, 83 per cent. in central Illinois and 88 per cent. in the southern division of the State.

WINTER WHEAT.

The June 20 reports show that winter wheat has deteriorated 14 points since May 1, its condition being but 17 per cent. of a seasonable average in northern Illinois, 41 per cent. in central Illinois and 53 per cent. in the southern division of the State. Thirteen counties in the northern division, three in the central and one in the southern division report the crop an entire failure, and in a number of other counties it is practically so.

The February freeze killed a large proportion of the wheat and Hessian fly completed the work of destruction, their depredations being specially noted in southern Illinois. In Adams and Johnson counties there is some rust on wheat, and in Massac county smut. In St. Clair wheat scab is reported, and in Marion the straw is badly broken.

SPRING WHEAT.

The area devoted to spring wheat this year is 5 per cent. smaller than in 1898 in northern Illinois, and in the central and southern divisions no acreage is reported at all.

The June 20 condition of the crop in northern Illinois is 92 per cent. of a seasonable average, a decrease of 1 per cent. since the last report on May 1.

OATS.

The area devoted to oats this year is 4 per cent. larger than in 1898 in northern Illinois, and 3 per cent. larger in the central division of the State, while in the southern division the area devoted to this crop is but 81 per cent. as compared with 1898.

The condition of the crop has improved since May 1 in northern and central Illinois, where the June 20 condition is 100 and 97 per cent. of a seasonable average respectively, as compared with a condition of 92 and 90 per cent. respectively on May 1. In the southern division of the State the June 20 condition is reported as being 91 per cent. of a seasonable average, being the same as reported on May 1.

In Cass and Cumberland counties oats are being damaged by cut worms, and rust or smut is reported in Kankakee, McHenry, Peoria, Cass, Cumberland, Douglas and Fulton counties. Oats are lodging badly in Bureau, Jo Daviess, Kendall, LaSalle, Peoria, Whiteside, McLean and Moultrie counties.

RYE.

The June 20 condition of this crop is reported as being 79 per cent. in the northern division of the State, 86 per cent. in the central division and 77 per cent. in the southern division, as compared with 71 per cent., 79 per cent. and 83 per cent. respectively on May 1.

BARLEY.

The condition of this crop has improved since May 1, it now being reported as 100 per cent. as compared with 94 per cent. on that date.

MEADOWS.

The June 20 condition of meadows is not so good in northern and southern Illinois as on May 1, being 72 per cent. in the northern division and 88 per cent. in the southern division, as compared with 73 and 95 per cent. respectively on May 1.

In central Illinois the condition is 5 per cent. better than on May 1, being now 93 per cent. of a seasonable average.

Meadows are reported as being very weedy in Jasper, Massac, Pope, St. Clair, Wabash and Williamson counties.

CLOVER.

There is a very marked decrease in the area devoted to clover meadows as compared with last year, and especially so in the northern and central divisions of the State.

The area devoted to this crop in northern Illinois is but 32 per cent. as compared with last year and the condition is very bad, being only 39 per cent. of a seasonable average.

In the central division the area is 69 per cent. as compared with last year, and the condition is 83 per cent.

In the southern division the area is given as 87 per cent. compared with last year, and the June 20 condition is 85 per cent. of a seasonable average.

HUNGARIAN AND MILLET.

There is an increase of 9 per cent. in the area devoted to this crop in northern Illinois as compared with last year.

In central Illinois the area is 100 per cent. compared with last year, while in southern Illinois there is a deficiency of 11 per cent. in the area as compared with last year.

PASTURES.

There is a decrease of 6 per cent. in the area of pastures as compared with last year.

The condition in northern Illinois is 90 per cent.

In central Illinois the condition is reported as being a full seasonable average, while in the southern division the condition is 98 per cent.

IRISH POTATOES.

Northern and central Illinois report the same area devoted to Irish potatoes as in 1898, while southern Illinois reports only a decrease of 2 per cent.

The June 20 condition of the crop is much better than on the same date last year, and the entire State promises at this time a full average crop.

In northern Illinois the condition is 3 per cent. above an average, and in the central and southern divisions it is 99 and 96 per cent. respectively.

Potato bugs are doing considerable damage in Bureau and Kane counties, and in Will county potatoes are being damaged by flies. In Lee and McHenry counties potatoes are being considerably damaged by a long black bug.

SWEET POTATOES.

The area devoted to sweet potatoes in northern Illinois this year is 2 per cent. less than in 1898, and the June 20 condition of the crop is 97 per cent. of a seasonable average.

In the central division of the State the area is 5 per cent. less than last year, and the condition of the crop is 96 per cent.

In southern Illinois the area is 88 per cent. as compared with last year and the condition is 91 per cent.

TOBACCO.

There is a deficiency of 10 per cent. in the area devoted to this crop in northern Illinois as compared with last year, and the June 20 condition of the crop is but 87 per cent. of a seasonable average.

In central Illinois the area is same as reported in 1898, and condition promises a full average crop.

In southern Illinois the area is 79 per cent. as compared with 1898, and the condition is 84 per cent.

FIELD BEANS.

The area devoted to field beans this year as compared with 1898 is reported as 93 per cent. in the northern and southern divisions, and 97 per cent. in central Illinois.

The June 20 condition of the crop is 88 per cent. in the northern, 91 per cent. in the central and 93 per cent. in the southern division of the State.

FIELD PEAS.

There is a decrease of 4 per cent. in the area devoted to field peas in northern Illinois, but in central and southern Illinois there is an increased area as compared with 1898. In central Illinois the increase is 6 per cent. and in southern Illinois the area is 10 per cent. greater than last year.

FRUIT.

Fruit prospects continue to be fully as promising as on May 1, when last report was issued.

Apples are reported from St. Clair county as being badly affected by scab, while in Madison, Marion, Pope and Wabash they are falling badly. In Madison county plums are also reported as falling badly.

CHERRIES.

The yield of cherries this year is not nearly so good as usual.

In northern Illinois the yield is 91 per cent. of a seasonable average, while in central and southern Illinois the yield is but 79 and 48 per cent. respectively.

STRAWBERRIES.

There was but 69 per cent. of an average crop of strawberries produced in northern Illinois this year, while in the central and southern divisions the crop yielded better than in 1898, being 89 per cent. of an average crop in both divisions.

RASPBERRIES.

The yield of raspberries is much lighter this year than last, being only 75, 80 and 70 per cent. of a crop respectively in the northern, central and southern divisions of the State.

GOOSEBERRIES.

Gooseberries did not yield so well this year as last. The yield in northern Illinois being 78 per cent. of an average, 74 per cent. in central Illinois and 68 per cent. in the southern division of the State.

CURRANTS.

There is quite a deficiency in the yield of currants as compared with last year. Northern Illinois reporting 78 per cent. of an average crop. Central Illinois 81 per cent. and southern Illinois only 65 per cent. of a crop.

VINEYARDS.

Vineyards in northern Illinois suffered badly the past winter. The area devoted to them in northern Illinois is but 52 per cent. as compared with 1898, and the condition on June 20 is but 44 per cent. of a seasonable average.

In central Illinois the area is 98 per cent. as compared with last year, and the condition 91 per cent.

In southern Illinois there is a decrease of 7 per cent. in the area as compared with 1898, and the June 20 condition is 92 per cent.

YOUNG LIVE STOCK.

PIGS.

The number of pigs this spring was 10 per cent. below an average in northern Illinois, 13 per cent. below in the central and 10 per cent. below in the southern division.

The condition of pigs is almost up to an average, being 95, 97 and 96 per cent. in the three divisions of the State.

LAMBS.

In northern Illinois the number of spring lambs was 96 per cent. of an average, in central Illinois the number was 94 per cent. and in southern Illinois 88 per cent.

Their June 20 condition is 99, 100 and 97 per cent. respectively in the northern, central and southern divisions of the State.

CALVES.

There is a deficiency of 1 per cent. in the number of calves in the northern division of the State this year, 2 per cent. in the central division and 6 per cent. in the southern division. Their condition is 99 per cent. of a seasonable average over the entire State.

COLTS.

The number of colts reported this spring is greater than last year, though not up to a full average. In the northern division of the State the deficiency is but 2 per cent.; in the central division 5 per cent., and in the southern division 12 per cent.

The condition of colts is 98 per cent. of a seasonable average.

The value of colts at weaning time is better than last year in each of the grand divisions of the State, being \$25.00 in the northern, \$24.00 in the central and \$22.00 in the southern division, as compared with \$21.00 in northern and central, and \$18.00 in southern division last year.

The cost of service of stallions is same as reported in 1898, being \$9.00 in northern and central Illinois, and \$7.00 in the southern division.

WOOL.

The wool clip of the northern division of the State was as large this year as in 1898, but in central Illinois there was a deficiency of 4 per cent. and in the southern division of 5 per cent.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent., is recorded 110; a decrease of five per cent. is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,

Secretary.

ILLINOIS CROP REPORT

:: FOR ::

AUGUST 1, 1899.

Synopsis of the Reports of Correspondents Upon the Acreage and Condition of the Growing Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,
SPRINGFIELD, August 1, 1899.

The information contained in this circular was obtained from the reports of correspondents mailed to this office the first of August.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past twenty-three years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number nearly six hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WHEAT.

The August 1 reports of correspondents in regard to the area of wheat winter-killed confirm their reports made three months ago on this point, there being a variation of but three points. According to this final estimate, 48 per cent. of the area seeded last fall, or 1,100,120 acres, was destroyed and plowed up, leaving 1,168,151 acres for harvest. The area of spring wheat seeded this year was 45,928 acres, making a total of 1,214,109 acres for harvest. The average yield per acre was the same as in 1898, 9 bushels on the area harvested, making a total yield of 11,054,236 bushels. Of this amount northern Illinois produced 739,245 bushels, central Illinois 3,227,537 bushels, and southern Illinois 7,087,454 bushels.

The average price of wheat on August 1 was 65 cents per bushel, making the total value of the crop \$7,172,313.

There has been practically no damage to wheat by insects this season. In Adams and Marion counties there is said to be more cheat than usual, but it is not reported from other portions of the State.

163203

CROP REPORT.

The following table gives the area, yield and value of the wheat crop of the State during the last forty years.

WHEAT (SPRING AND WINTER.)

YEAR.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

WHEAT CONSUMPTION.

In estimating the amount of wheat required in the State for seed and bread, it is necessary to consider the entire area seeded instead of that harvested, as the amount required for seed is based on the area seeded last year, which was 2,314,229 acres.

As one and one-third bushels per acre is the usual amount for seed, it will take 3,685,636 bushels for this purpose.

It is estimated that each person eats, in the form of bread, 4 bushels of wheat each year, and as the population of Illinois by the last census was 3,817,832, there will be consumed in that way 15,271,328 bushels, making a total of 18,956,964 bushels actually needed for our own use. As but 11,054,236 bushels were raised in this State this year, it will be necessary for us, instead of exporting wheat, to import 7,302,728 bushels, or its equivalent in flour, for domestic use.

OATS.

Although the area seeded to oats last spring was smaller than a year ago by nearly 100,000 acres, the yield was so much heavier than usual, 41 bushels per acre, that on the 3,653,604 acres, 151,382,020 bushels were produced, the largest oat yield ever produced in the State. In northern Illinois 93,793,861 bushels were produced, in central Illinois 43,992,679 bushels, and in the southern division of the State 13,595,480 bushels.

The ruling price August 1 was 19 cents per bushel, and if the entire crop had been sold at that price, it would have returned to the producer \$28,377,878.

Smut in oats is reported from Carroll, Lake, Logan, Macon, Macoupin, Tazewell and St. Clair counties, and rust in Kane, Lake, Logan and Union counties. Oats generally grew up very rank, and in consequence lodged quite badly in some sections. The counties reporting lodging are Jo Daviess, Kane, McHenry, Whiteside and Winnebago. Chinch bugs are reported in oats in Macoupin, and grasshoppers in Macoupin and Lake counties.

The following table gives the area, yield and value of the oat crop of the State during the past forty years.

YEAR.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of the oat crop in each county in the State this year.

RYE.

The area devoted to rye in Illinois this year was 113,287 acres, of which 81,515 acres were in the northern grand division of the State, 25,332 acres in the central division, and 6,440 acres in southern Illinois.

The average yield per acre was 15 bushels, and the total yield 1,658,846 bushels, northern Illinois producing 1,198,841 bushels, central Illinois 378,254 bushels, and the southern division of the State 81,751 bushels. The ruling price August 1 of 45 cents per bushel was the highest price since 1895, and made the crop worth at that date \$751,290.

The following table gives the area, yield and value of the past forty rye crops grown in the State.

YEAR.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of rye in each county in the State.

BARLEY.

But 15,151 acres were devoted to barley in this State this year, and almost all of that, 11,907 acres, was in northern Illinois.

The average yield per acre of 31 bushels has never been exceeded. The total yield was 478,731 bushels.

The ruling price of barley on August 1 was 33 cents, the highest price reported for a number of years. The total value of the crop at this price was \$157,738.

The following table gives the area, yield and value of the past forty barley crops produced in this State.

YEAR.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre	Total cost of production.	Profit.	Loss.

In a table published elsewhere in this report will be found the area, yield and value of the barley crop in the State by counties.

HAY.

There is not much variation in the area devoted to meadows from year to year. The 1899 area of 2,565,191 acres is but 28,687 acres more than in 1898. Almost one-half of the meadow area of the State is in the northern grand division, 1,204,402 acres being reported there, while there is but 794,170 acres in the central division and 566,619 acres in southern Illinois.

The past winter was very hard on meadows, clover especially being badly winter killed, so that the yield is below the normal, being but 1.27 tons per acre. In the northern and southern divisions the average yield was only 11-8 tons, but in central Illinois it was 11-2 tons.

The yield of clover was but 3-8 tons per acre in northern Illinois and 11-2 tons in central and southern Illinois, many counties in the northern division reporting the crop an entire failure. The quality of the clover hay is poor, only 42 per cent. of the normal in the northern division, 92 per cent in the central, and 89 per cent. in the southern divisions.

The total yield of hay in northern Illinois was 1,379,860 tons; in central Illinois 1,232,541 tons, and in the southern division 652,607 tons, the entire yield for the State being 3,265,008 tons.

The average price of hay on August 1 was a little better than for some years past, being \$6.35 per ton. In the northern division it was \$7.05 per ton; in the central division \$5.45, and in southern Illinois \$6.60.

Had the entire crop been sold at these prices, it would have returned to the producer \$20,769,635.

There is a great deal of complaint of meadows being weedy, the principal enemy of this kind being yarrow or "white weed," but in Jo Daviess county rag weed also is said to be a nuisance.

The following table gives the area, yield and value of the past forty hay crops of the State.

YEAR.	Number of acres.	Average yield per acre—tons.	Tons produced.	Price per ton.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

The area, yield and value of the hay crop of 1899 for each county in the State is given in a table published elsewhere in this report.

CORN.

According to the latest returns made to this office, the corn area is not quite so large as in 1898, 6,925,492 acres being reported.

In central Illinois there is an increase of 30,000, but in northern Illinois the deficiency as compared with last year is 30,318, and in the southern division 18,182 acres.

The August 1 condition of corn is excellent, 90 per cent. of normal. In the northern division of the State it is 97 per cent. of a seasonable average, in the central division 88 per cent., and in the southern division 92 per cent., which is a much more encouraging condition than at this time a year ago. In Union county the early corn is already glazed.

While chinch bugs have been reported in corn from the counties of Jersey, Macoupin, Mason, Clinton, Crawford, Madison, Randolph, Richland and White, they have done no material damage. Corn root worm and louse are reported from Marshall, Christian, Cumberland, Clay and St. Clair counties, and wire worms have done some injury in Coles and Vermilion counties. Corn has lodged to some extent in Menard and Morgan counties, and the plant has "fired" or suffered from drought in Iroquois, De Witt, Sangamon, Shelby, Tazewell, Clinton and Effingham counties, but on the whole the August 1 condition is encouraging for a much larger crop than was anticipated early in the season, when planting was so long delayed.

Under the most favorable conditions there will be a good deal of late corn which can not mature, but the progressive farmers of the State understand that this is far from a total loss, as much of it will be fed immediately to stock, and another large portion of it will be preserved in silos for winter use.

BROOM CORN.

The August 1 condition of this crop is encouraging for a full average yield per acre in northern Illinois, 85 per cent. of an average in central Illinois, and 89 per cent. in the southern division of the State. In Coles county the late broom corn is very badly injured by chinch bugs and a green moth.

SORGHUM.

The condition of sorghum August 1 was 3 points better than on June 20; in northern Illinois it was 96 per cent. of a seasonable average, in central Illinois 85 per cent., and in the southern division 91 per cent.

PASTURES.

An increase of 210,831 acres in pastures over 1898, is reported this year. The increase in the northern division of the State is 54,653 acres; in the central division it is 180,949, while southern Illinois reports a decreased area of 24,771 acres.

The August 1 condition of pastures is not so good as six weeks ago, nor as at this time last year. In northern and southern Illinois their condition is 89 per cent. of a seasonable average, and in central Illinois 84 per cent.

Pastures have suffered from drought in Clay county, and grasshoppers have done some damage in Iroquois, while the pastures are very weedy in Lee, Ogle, Putnam, Winnebago, and Adams counties.

IRISH POTATOES.

The August 1 condition of Irish potatoes is very promising, being 5 per cent. above the normal in the northern grand division, 5 per cent. below in the central, and 9 per cent. below in the southern division.

SWEET POTATOES.

Although their August 1 condition is not quite so encouraging as Irish potatoes, this crop promises 91 per cent. of an average yield per acre in northern and southern Illinois, and 93 per cent. in the central division of the State.

BUCKWHEAT.

A smaller area than last year is reported in buckwheat this season, the deficiency in northern Illinois being 6 points, in central Illinois 12, and in the southern division 4 points.

The August 1 condition of the crop is 92 per cent. of a seasonable average in the northern division, 86 per cent. in the central division, and 97 per cent. in the southern division.

TURNIPS AND OTHER ROOT CROPS.

In northern Illinois the area in root crops as compared with 1898 is 97 per cent.; in central Illinois it is 88 per cent., and in the southern division 95 per cent.

Their August 1 condition was 96 per cent. of an average in the northern division, 87 per cent. in the central, and 94 per cent. in the southern division.

In some sections of the State the attention paid to sugar beets materially increases the area of these crops, Tazewell county reporting over 700 acres of this root.

TOBACCO.

Three counties in northern Illinois report an average condition of 95 per cent., and five in the central division report 85 per cent. as their average condition, while in southern Illinois, where the principal part of this crop is raised, its August 1 condition is 87 per cent.

CASTOR BEANS.

In the northern and central divisions of the State the August 1 condition of castor beans is a full average, but it is but 86 per cent. of an average in the southern portion of the State.

FIELD PEAS.

In northern Illinois the condition of field peas is 96 per cent. of an average; in central Illinois it is 94 per cent., and in the southern division 99 per cent.

Considerable attention is being paid to cow peas in southern Illinois. In Richland county their area is said to be 200 per cent. greater than last year, and in Union county the increase is 300 per cent.

FIELD BEANS.

The August 1 condition of this crop in northern Illinois is 97 per cent. of a seasonable average; in central Illinois it is 88 per cent., and in the southern division 95 per cent.

Soja beans are being cultivated to a considerable extent in southern Illinois, Richland county reporting a largely increased area this year.

FRUIT.

APPLES.

The condition of the apple crop is not so good as is to be desired, being less than 75 per cent. of a seasonable average.

In northern Illinois their August 1 condition is 76 per cent. of an average; in central Illinois it is 72 per cent., and in the southern division 65 per cent.

PEACHES.

The peach crop of the State may be regarded as an entire failure, its August 1 condition being but 13 per cent. of an average in the northern grand division, 5 per cent. in the central and 3 per cent. in the southern division.

PEARS.

A little more favorable condition exists in regard to pears than to peaches, but their August 1 condition is encouraging for but little over 50 per cent. of a seasonable average.

In northern Illinois their condition is 47 per cent. of an average, in central Illinois it is 56 per cent., and in the southern division 57 per cent.

PLUMS.

The August 1 condition of plums is 71 per cent. of an average in the northern division, 76 per cent. in the central division, and 54 per cent. in the southern division.

GRAPES.

In northern Illinois the August 1 condition of grapes is very poor, being but 46 per cent. of a seasonable average. In central Illinois their condition is 85 per cent., and in the southern grand division 81 per cent.

In Massac county the grapes are rotting badly.

QUINCES.

The average condition August 1 of the three counties reporting on quinces in northern Illinois is 85 per cent.; in central Illinois their condition is 71 per cent., and in the southern division of the State but 58 per cent.

BLACKBERRIES.

Three-fourths of an average crop of blackberries was produced in the northern division of the State this year, and 84 per cent. in the central division, while less than half a crop, 45 per cent. was reported in southern Illinois.

LIVE STOCK.

With the few exceptions named below there has been no complaint of disease among the stock.

Hog cholera has prevailed to some extent in the counties of Kendall, Knox, Mercer, Stark, Fulton, Greene, Mason, Sangamon, and St. Clair.

In Whiteside county there has been some distemper among horses, and in Fayette several cases of anthrax have been reported. There has been an epidemic of sore eyes among cattle in Will county, and in St. Clair horses have been troubled in the same way. There have been some cases of black scours in lambs in Stark county, and in Wayne there have been heavy losses of lambs from "paper skin."

Flies of various kinds, but more especially horn flies, have been very numerous this summer and have worried cattle a great deal, keeping them thin in flesh.

DRAIN TILE.

During 1898 there were 7,318,675 feet of drain tile laid in this State, 5,821,616 feet being reported from northern Illinois, 1,496,329 feet from central Illinois, and 730 feet from the southern grand division.

The total number of feet laid in the State is 703,929,225 feet, or an average of 28 feet for each acre of cultivated land. In the northern division the average number of feet per acre is 40; in the central division 33, and in the southern division only 1. Many counties in this section of the State have not so much as 1 foot per acre.

The county reporting the largest number of feet per acre is Vermilion with 186; Iroquois has 146, Macon 144 and Douglas 134. No other counties have as much as 100 feet per acre.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent., is recorded 110; a decrease of five per cent. is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,
Secretary.

ILLINOIS CROP REPORT

: : FOR : :

DECEMBER 1, 1899.

Synopsis of the Reports of Correspondents Upon the Acreage and Yield of Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,
SPRINGFIELD, December 1, 1899.

The information contained in this report as to acreage of crops and number of head of live stock was obtained from the reports of assessors made to this Department as required by law.

The data in regard to yield per acre, price of crops and value of crops and live stock was obtained from crop correspondents, who number nearly six hundred, and represent every section of the State.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past twenty-three years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WINTER GRAIN.

WHEAT.

Last year's experience with winter wheat was very discouraging to the producer, and as a consequence the area seeded last fall is considerably below that of 1898, crop correspondents estimating the 1899 area as 2,027,617 acres.

While there was a deficiency in area of 17 per cent. in northern Illinois, and 19 per cent. in the central division, in southern Illinois it was but 3 per cent., giving an area in this section of the State of 1,098,767 acres. In the central division the area is 893,134 acres, and in the northern division 35,716 acres.

While the December 1 condition of the crop is nearly normal, being 94 per cent. of an average in northern Illinois, 96 per cent. in central Illinois, and 99 per cent. in the southern division of the State, it falls below the December 1, 1898, condition, which was 99 per cent.

123233

A number of counties in central and southern Illinois report the presence of Hessian fly in the wheat, but it is too early to ascertain the amount of damage done by this pest. The counties in which it is reported are Calhoun, Christian, Clark, Edgar, Fulton, Greene, Jersey, Macoupin, Menard, Morgan, Pike, Sangamon, Schuyler, Scott, Tazewell, Clinton, Crawford, Franklin, Madison, Marion, Massac, Monroe, Pope, Richland, Washington and White.

Army worms destroyed some fields of wheat in Greene county and did some damage in Mason county also, where chinch bugs also injured it. In Morgan county the early wheat was somewhat injured by grasshoppers, and in Tazewell, Franklin and Gallatin counties by cut worms. Wire worms have been at work in Massac county, where some insect is working at the root of the plant.

RYE.

The rye area of Illinois for 1900 is estimated at 102,348 acres, a deficiency of 10 per cent. as compared with 1899. In northern Illinois the area is 73,543 acres, in central Illinois 22,805 acres, and in the southern division of the State, 6,000 acres.

The December 1 condition of rye is 97 per cent. of an average in the northern division of the State, 100 in the central division, and 99 in the southern division, the State average being 99 per cent.

The same insect that is working at the roots of wheat in Massac county, is at work on rye roots also.

CORN.

The 1899 corn area of Illinois was a little smaller than that of 1898, 6,941,548 acres being reported. Of this number 3,101,606 acres were in the northern grand division, 2,831,062 acres in the central division, and 1,008,880 acres in the southern division.

The average yield per acre this year of 37 bushels is above the average, but varies greatly throughout the State, 41 bushels per acre being produced in northern Illinois, 36 bushels in central Illinois, and 30 bushels in the southern division of the State. The total yield for the State was 259,618,956 bushels, a much greater yield than for the two preceding years.

The average price was 26 cents per bushel, the value of the crop at this rate being \$67,791,697, the most profitable crop since 1894.

While there have been many complaints of damage to corn from one cause or another,—wet weather, drought, early frost, etc.—the quality of the grain is 90 per cent. of an average, and is 11 per cent. better than that of 1898. The quality of the crop in the northern division of the State is 95 per cent. of an average; in the central division it is 83 per cent., and in the southern division 91 per cent.

A good many cases of sickness and death among live stock are attributed to their eating frosted or mouldy corn.

The area, yield and value of the corn crop of the State for the past forty years is given in the following table:

YEAR.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel—cents.	Total value.	Value per acre.	Cost of production.	Total cost of production.	Profit.	Loss.

BROOM-CORN.

With a slightly larger area than in 1898, and one of the largest yields per acre ever reported, and the highest price per ton ever known, the broom-corn crop of 1899 was, with one exception, the most lucrative ever grown in the State. The area reported was 24,035 acres, practically all of it being located in the central division of the State, and the two counties of Coles and Douglas.

The average yield per acre was about two-fifths of a ton, the total yield amounting to 9,580 tons.

During the growing season speculators "cornered" the crop, the average price being forced up to \$171 per ton, although in many instances the product sold even higher than this. As a consequence the broom-corn crop of the State became worth \$1,630,823, a value which has been exceeded but once, in 1881, when the yield was much larger than this year.

There is apparently no condition existing in the counties where broom-corn is made a specialty, which does not obtain in many other counties of the State, and if our farmers would give some of their attention to this crop, there is no doubt but that they would find it to their advantage.

The following table gives the area, yield and value of the broom-corn crop of Illinois since 1876:

YEAR.	Acreage.	Av. yield per acre— lbs.	Total yield lbs.	Price per ton.	Value of crop.
1877.....	14,566	458	6,674,737	\$71 20	\$237,594
1878.....	18,258	614	11,218,168	49 50	277,645
1879.....	17,654	632	11,161,238	86 75	484,195

SORGHUM.

The area devoted to sorghum in Illinois in 1899 was 9,816 acres, 566 acres being reported from northern Illinois, 2,764 from central Illinois, and 6,486 acres from the southern division of the State.

The average yield of 56 gallons per acre was the largest yield since 1890. The total yield was 545,097 gallons, of which 555,159 gallons were produced in southern Illinois, 241,454 gallons in central Illinois, and 48,484 gallons in the northern division of the State.

The average price per gallon of 33 cents is the same as for three years past. Had the entire product been sold at that price, it would have returned to the producer \$281,269.

The following table gives the area, yield and value of the sorghum crops produced in the State since 1876:

YEAR.	Acreage.	Av. yield per acre— gallons.	Total number of gallons.	Price per gallon.	Value of crop.
1877	19,335	63	1,237,164	\$0 42	\$515,409
1878	14,638	80	1,174,549	45	528,547
1879	17,883	73	1,303,400	38	497,572
1880	9,825	65	636,216	42	267,211
1881	8,263	55	456,714	55	251,193
1882	13,757	61	816,892	50	408,446
1883	14,023	90	1,272,287	50	604,157
1884	13,854	100	1,389,243	45	631,270
1885	13,890	92	1,289,426	40	519,622
1886	12,637	81	1,021,855	38	393,497
1887	11,231	60	673,736	46	309,098

1898	10,934	81	887,257	33	289,310
1899	9,816	86	845,097	33	281,269

BUCKWHEAT.

But 2,453 acres were reported in buckwheat in 1899. Of this number 926 acres were in northern Illinois, 754 acres in central Illinois, and 733 acres in the southern division of the State. The average yield per acre of 16 bushels, was larger than for a number of years past.

Of the total yield of 38,627 bushels, 17,149 bushels were produced in the northern division, 10,563 bushels in the central division, and 10,915 bushels in the southern division of the State.

The ruling price of 54 cents per bushel is below the average. The total value of the crop at this rate is \$21,083, a little larger return than in 1898.

The following table gives the area, yield and value of the buckwheat crop in this State for the past twenty-three years:

YEAR.	Acreage.	Av. yield per acre.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	15,880	13	207,698	\$0 73	\$151,612

1899.....	2,453	16	38,627	54	21,083

TIMOTHY SEED.

The yield of timothy seed in 1899 was 145,925 bushels, an increase of nearly 30,000 bushels over 1898. A comparatively small amount of timothy seed is raised in the central and southern divisions of the State, but in northern Illinois 95,520 bushels were produced.

The price per bushel of \$1.50 is better than for the last three years, and the total value of the crop, \$213,597, is the greatest since 1895.

The following table gives the amount and value of the crop in this State since and including 1877:

YEAR.	Bushels produced.	Price per per bushel.	Value of crop.
1877.....	493,571	\$1 25	\$604,464
1878.....	261,559	1 25	326,949

1899.....	145,925	1 50	218,597

CLOVER SEED.

Never has there been so nearly a complete failure in clover seed as during 1899, when but 50,125 bushels were produced. Of this quantity 10,922 bushels were produced in northern Illinois, 15,524 bushels in central Illinois, and 23,679 bushels in southern Illinois.

An average price of \$3.90 per bushel was obtained, the best price since 1894. The total value of the crop at this price was \$195,477, the least amount ever received for clover seed in Illinois.

In the following table will be found the yield and value of the crop of clover seed for 1898, as compared with the twenty-two years preceding:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	64,686	\$4 80	\$310,493
1878.....	77,388	4 05	313,421
1879.....	138,191	5 00	690,955
1880.....	87,144	4 60	400,862
1881.....	125,042	5 20	650,218
1882.....	55,862	5 00	279,310
1883.....	78,656	4 75	375,066
1884.....	138,920	4 40	609,945
1885.....	72,969	5 00	365,523
1886.....	122,612	4 30	524,271
1887.....	180,267	4 15	747,982
1888.....	122,906	4 60	563,412
1889.....	78,005	3 15	245,695

1897.....	193,509	3 15	606,389
1898.....	108,784	3 45	374,702
1899.....	50,125	3 90	195,477

HUNGARIAN AND MILLET SEED.

There is a slight increase in the amount of hungarian and millet seed produced in Illinois in 1899, over the product of 1898, 63,860 bushels having been reported. But little attention is paid to these crops in central and southern Illinois, the northern division of the State producing 54,056 bushels.

The average price per bushel of 59 cents is higher than for the three preceding years, and had the entire crop been sold at that price it would have returned to the producer \$37,918.

The following gives the yield and value of this crop since 1876:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	17,463	\$0 65	\$10,701
1878.....	26,787	55	14,733
1879.....	43,776	75	32,832
1880.....	66,889	70	46,752
1881.....	76,180	95	72,370
1882.....	77,423	60	53,422
1883.....	70,007	62	43,201
1884.....	33,513	51	17,187
1885.....	22,203	60	13,418
1886.....	32,175	54	17,553
1887.....	39,049	65	25,385
1888.....	55,888	63	35,126

1897.....	82,428	48	39,718
1898.....	58,249	54	31,341
1899.....	63,860	59	37,918

BEANS.

The area devoted to beans in Illinois this year is about the same as last, 1,532 acres being reported. Of this area, 1,035 acres are situated in the southern division of the State, and but 497 acres in the other two grand divisions.

The average yield per acre was 13 bushels, and the total yield 19,362 bushels.

Not since 1894 has the market price of beans been so high as this year, when they averaged \$1.60 per bushel, making the total value of the crop \$31,200.

The following table gives the area, yield and value of the 1898 crop of beans, together with those of twenty-two years preceding:

YEAR.	Acreage.	Av. yield per acre—bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	1,545	13	19,955	\$1 50	\$29,916
1878.....	1,669	16	18,627	1 35	25,146
1879.....	2,674	14	36,217	1 50	53,225

1898.....	1,529	12	19,000	1 10	21,093
1899.....	1,532	13	19,362	1 60	31,200

CASTOR BEANS.

There has been very little change in the area devoted to castor beans in this State for a number of years past. In 1899, 7,435 acres were reported, almost the entire area being in southern Illinois. An average yield of 9 bushels per acre was obtained, giving a total yield of 70,621 bushels.

The ruling price of \$1.15 per bushel is rather better than the average price of the last few years, and the total value of the crop is greater than any since 1893.

In the following table is given the area, yield and value of the last twenty-three crops of castor beans:

YEAR.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	4,503	3¼	17,538	\$1 10	\$18,512
1878.....	371	7	2,526	1 25	3,157

1899.....	7,435	9	70,621	1 15	80,707

TOBACCO.

There was a slight increase in the area devoted to tobacco this year over last, 4,474 acres being reported. In common with beans and castor beans, almost the entire tobacco area is in the southern division of the State.

The average yield per acre was 690 pounds, and the total yield 3,086,850 pounds.

The value of the crop is estimated as \$221,732, an average value of 7 cents per pound.

CROP REPORT.

The following table gives the area, yield and value of the crop in this State since 1876:

YEAR.	Acreage.	Av. yield per acre— pounds.	Pounds produced	Price per pound.	Value of crop.
1877.....	12,320	640	7,885,586	\$0 08	\$638,848

PASTURES.

A larger pasturage area is reported this year than for four years past, 4,880,101 acres being reported. Nearly half of this area is in the northern division of the State, 2,466,103 acres. In the central division of the State there are 1,822,357 acres, and in southern Illinois 591,641 acres.

The average value of pastures was \$3.50 per acre, being \$3.60 in northern Illinois, \$3.55 in central Illinois, and \$2.70 in the southern division of the State.

The total value of the 1899 pastures of Illinois was \$16,999,055.

The following table gives the area and value of pastures for twenty-three years past:

YEAR.	Acreage.	Value per acre.	Value of crop.
1877.....	4,367,603	\$3 38	\$14,764,112
1878.....	3,983,450	3 10	12,324,657

VEGETABLES.

IRISH POTATOES.

There has been a steady decrease in the area devoted to Irish potatoes in Illinois during the past six years, only 92,992 acres being reported in 1899. Of this area 42,859 acres were in northern Illinois, 17,772 acres in central Illinois, and 32,361 in the southern division of the State.

The average yield per acre was 100 bushels, the highest yield since 1891. The total product was 9,290,445 bushels.

The average price received by the producer for potatoes was 39 cents, making the total value of the crop \$3,641,133, the most profitable potato crop for a number of years.

CROP REPORT.

The following table gives the area, yield and value of the Irish potato crops of the State since 1859:

YEAR.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.
1860	69,225	80	5,540,800	\$0 31	\$1,717,520	\$24 80	\$20 55	\$1,422,574	\$294,946

SWEET POTATOES.

The largest area since 1394 was devoted to sweet potatoes in this State this year, 3,263 acres, almost the entire area, 2,313 acres, being in southern Illinois.

The average yield per acre was 83 bushels, making a total yield of 281,330 bushels.

The average price received was 73 cents per bushel, giving a total value of \$206,972.

The following table gives the area, yield and value of the sweet potato crop of the State for the past twenty-three years:

YEAR.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877	2,355	63	148,270	\$0 85	\$126,092
1878	1,729	67	116,944	85	99,402
1879	1,423	88	126,169	90	112,552
1880	3,882	66	224,523	90	202,070

1898	3,074	117	360,116	40	143,350
1899	3,263	86	281,330	73	206,972

TURNIPS AND OTHER ROOT CROPS.

Quite a decrease in the area of turnips and other root crops is noted in Illinois this year, but 700 acres being reported. The value of these crops was \$99,396, there being \$40,710 in northern Illinois, \$22,576 in central Illinois, and \$36,110 in the southern division of the State, an average value of \$142 per acre.

The average yield per acre of turnips was 127 bushels in the northern division of the State, 91 bushels in the central, and 109 bushels in the southern division, giving a State average of 103 bushels.

The following table gives the acreage and value of turnips and other root crops grown in the State during the past twenty-three years:

YEAR.	Acreage.	Value per acre.	Value of crop.
1877	7,056	\$39 55	\$279,136
1878	3,775	40 85	154,140
1879	5,139	230 15	722,444
1880	2,300	45 85	105,414
1881	3,046	147 20	448,369
1882	3,809	245 25	934,291
1883	4,361	205 75	897,804
1884	3,856	75 75	292,181
1885	3,002	83 50	257,387
1886	5,002	76 75	383,966
1887	2,592	81 20	210,432
1888	3,802	93 12	354,046
1889	4,509	118 42	533,950

1896	2,216	82 95	183,848
1897	734	149 75	109,934
1898	996	102 85	102,434
1899	700	142 00	99,396

OTHER CROPS NOT NAMED.

There are a number of crops raised in this State which are cultivated only in limited localities and are not of enough importance to be tabulated alone, but are of considerable value to producers.

Such small crops are included under this caption, and a table giving their value in each county in the State is published elsewhere in this report.

The value of these miscellaneous crops this year is less than in 1898, but \$151,133 being reported from northern Illinois, \$6,086 from central Illinois, and \$12,712 from the southern grand division, a total for the State of \$169,931.

FRUIT.

APPLES.

Even fewer apples were raised in Illinois this year than last, but 968,726 bushels being reported. Of this amount 84,474 bushels were produced in the northern division of the State, 183,551 bushels in the central division, and 695,701 bushels in the southern division.

The average price received was but 52 cents per bushel, less than half the ruling price in 1898. In northern Illinois apples brought about \$1 per bushel, a total value for this section of the State of \$83,919. In central Illinois the average price was 56 cents, and the total value \$104,481, and in the southern division, at an average price of 46 cents per bushel, the crop was worth \$318,633. The value of the entire apple crop of the State was \$507,033.

There has been great complaint of the poor quality of apples this year, and also of their lack of keeping qualities.

The following table gives the number of bushels apples and the value of the crops since 1876:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	5,395,351	\$0 80	\$4,316,281
1878.....	4,940,811	65	3,211,527
1879.....	5,858,690	75	4,469,017

1899.....	968,726	52	507,033

PEACHES.

While the peach crop of this State is always a very uncertain one, and never very large, it is rarely that it is so nearly an entire failure as this season, when but 29,586 bushels were produced, almost all in the southern division.

The average price obtained for this fruit was 95 cents per bushel, giving a total value of \$28,064.

The following table gives the quantity and value of the peaches produced in the State during the past twenty-three years:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	402,587	\$0 92	\$370,280

PEARS.

Less than 9,000 bushels of pears were raised in Illinois last year, 385 bushels being produced in the northern division of the State, 795 bushels in the central division, and 7,730 bushels in southern Illinois.

The average price of 94 cents per bushel was the best obtained since 1894, and had the entire product been sold at this price it would have returned to the producer \$8,426.

The following table gives the extent and value of the pear crop of the State since and including 1877:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	16,318	\$1 35	\$22,704
1878.....	13,510	1 25	16,887
1879.....	6,134	1 55	9,508

1899.....	8,910	94	8,426

GRAPES.

A larger grape crop is reported in Illinois this year than for several years past, 1,425,023 pounds being returned by assessors. There were 364,218 pounds produced in northern Illinois, 397,729 in central Illinois, and 663,076 in the southern division of the State.

The price of grapes is very stable, and varies little from year to year, 2 cents per pound having been the ruling price for a number of years.

The total value of the grapes sold in Illinois in 1899 was \$28,752, of which \$11,378 goes to the northern division, \$8,837 to the central division, and \$8,537 to the southern division.

The following table gives particulars concerning the grape crop of the State for the past twenty-three years:

YEAR.	Pounds produced.	Price per pound.	Value of crop.
1877.....	3,002,748	\$0 03	\$92,782
1878.....	1,822,636	03	57,679

1899.....	1,425,023	02	28,752

WINE.

Although a larger area than in 1893 is reported in vineyards this year, 1,141 acres, the amount of wine produced was less, but 69 gallons per acre, or a total product of 69,951 gallons. There were 27,712 gallons produced in northern Illinois, 20,408 in central Illinois, and 21,831 gallons in southern Illinois.

The average price obtained for the wine sold was 86 cents per gallon, making a total of \$60,544.

The following table gives the number of gallons of wine and the value thereof during the past twenty-three years:

YEAR.	Acreage.	Av. yield per acre—gallons.	Number of gallons produced.	Price per gallon.	Value of crop.
1877.....	2,612	61	158,944	\$1 20	\$191,933

1896.....	1,861	65 30	121,515
1897.....	2,252	69 80	157,199
1898.....	1,386	98 45	136,445
1899.....	968	102 70	99,425

STRAWBERRIES.

There was a depreciation in the value of the strawberry crop this year as compared with last of 13 per cent., the value of the crop being given as \$40,065. Of this amount \$13,368 is to the credit of northern Illinois, \$25,013 to southern Illinois, and \$3,684 to the central division of the State.

WATERMELONS.

The value of the watermelons produced in northern Illinois in 1899 was \$17,914; in central Illinois, and in the southern grand division \$6,811, a total valuation for the State of \$38,638.

The watermelon industry is growing rapidly in the northwest corner of White-side county. Hundreds of carloads were shipped from there last fall.

BEES AND HONEY.

The year 1899 was a very poor one for bees and honey, a smaller amount of honey being produced than ever before, but 398,025 pounds being reported. Of this amount northern Illinois produced 193,377 pounds, central Illinois 103,718 pounds, and the southern division of the State, 100,930 pounds.

The average price obtained for honey was 13 cents per pound, thus returning to the beekeepers of the State \$53,369.

The number of hives of bees in the northern division of the State was 20,035; in the central division 16,565, and in southern Illinois 18,583, a total of 55,183 hives.

The following table gives the amount and value of honey produced in this State during the past eight years, together with the number of hives of bees:

YEAR.	Pounds produced.	Price per pound.	Value of product.	Number of hives of bees.
1891	821,678	\$0 14	\$112,934	120,252
1892	575,356	14	83,294	81,928
1893	571,836	14	83,131	57,710
1894	542,796	14	76,782	70,113
1895	427,667	13	56,534	50,760
1896	433,043	13	55,900	45,411
1897	567,639	12	66,672	53,810
1898	689,446	12	82,480	62,054
1899	398,025	13	53,369	55,183

POULTRY AND EGGS.

More poultry was sold in Illinois in 1899 than the previous year, \$1,200,282 worth being reported. Of this amount, \$682,875 was in northern Illinois, \$341,815 in central Illinois, and \$175,592 in the southern division of the State.

There was also an increase in the value of eggs sold during the year, \$1,009,628, of which \$491,488 should be credited to the northern grand division, \$243,740 to the central, and \$274,400 to the southern.

LIVE STOCK.

HOGS.

Fewer hogs than for two years past were returned by assessors this year, the number being 2,796,483. Of this number 1,191,993 were in northern Illinois, 1,125,489 in central Illinois, and 479,001 in the southern division of the State. At the equalized value of \$0.84 per head the hogs of Illinois in 1899 would have been worth \$2,349,046.

Eighty-three per cent. of the whole number, or 2,321,060 were marketed, their average weight being 234 pounds, which gives a total weight of hogs marketed of 542,267,660 pounds.

The price of hogs has advanced somewhat during the last few years, and those marketed in 1899 brought an average price of \$3.60 per hundred. Their value in the northern division of the State was \$9,171,556; in the central division \$7,634,439, and in the southern division \$2,852,812—a total value of \$19,658,807.

The supply of hogs on hand December 1 was 10 per cent. below the same date last year, and the ruling price at that time of \$3.50 per hundred, is a little below the average for the year.

Cholera has continued to deplete the supply of hogs, its ravages having been reported from a great number of counties.

The following table gives the number of hogs assessed and marketed in 1899, as well as their weight and value, for the last forty-four years:

YEAR.	Assessors' Returns.		Estimated per cent. marketed.	Number fat hogs marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value hogs marketed.
	Number.	Value.

BEEF CATTLE.

A more encouraging condition of affairs as regards beef cattle, exists now than for a number of years past. Not since 1890 has so large a number of cattle been returned by assessors, and the price of those marketed is the highest obtained since 1884, and is 40 cents higher than last year.

The number of cattle reported in 1899 was 933,767 in northern Illinois, 637,531 in central Illinois, and 265,635 in the southern division of the State, making a total of 1,836,933. The equalized value of beef cattle this year is \$5.03, which would make the total value \$9,491,273.

About 23 per cent. of beef cattle in the State are marketed each year, the number for 1899 being 433,987. The average live weight of the cattle marketed was 1,122 pounds, or a total live weight of 487,048,640 pounds.

In northern Illinois the average value per hundred of cattle sold was \$4.30; in central Illinois \$4.65; in the southern division \$3.80—a State average of \$4.35.

The total value of cattle marketed in 1899 was \$21,236,398, the best return from this class of live stock since 1885.

The supply of cattle on hand December 1, 1899, as compared with December 1, 1898, was 90 per cent., and the ruling price on that date \$4.35 per hundred.

While there has not been a great deal of disease among cattle, a few cases have been reported. In Grundy county there has been some pinkeye among calves and young cattle; in DeWitt county three head of cattle were killed by the State Board of Live Stock Commissioners, and proved to be affected with tuberculosis; in Hancock county there has been some blackleg among calves, and in Mason many cattle have died from stalk bloat. There has been some disease among spring calves in McDonough county. An isolated case of lumpy jaw is reported from Massac county.

The following table gives the number, weight and value of the cattle marketed in the State since 1855:

YEAR.	Assessors' Returns.		Estimated per cent. marketed.	Number beef cattle marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Value beef cattle marketed.
	Number.	Value.						
1856.....	1,169,855	\$15,572,065	20	233,971	1,000	233,971,000	\$4 75	\$11,113,622

DAIRY COWS.

There is a slight increase in the number of cows kept in 1899 as compared with 1898, 628,841 being reported. Of these, 407,083 were in the northern division of the State, 135,139 in the central division, and 86,619 in the southern division.

Dairy cows have shared in the general prosperity of cattle, their average price this year being \$41 per head, an advance over last year of \$3,—and the highest average value ever reached in the State. The total value of the dairy cows of the State is \$25,651,244.

In Kankakee county some sickness has been caused among cows by the mouldy corn they have eaten.

The following table gives the number and value of the dairy cows kept in Illinois since 1878:

YEAR.	Number.	Av. value per head.	Total value.
1879.....	571,628	\$31 00	\$17,720,468
1880.....	613,738	31 00	19,035,878
1881.....	625,410	31 00	19,387,710

1896.....	617,515	32 00	19,829,860
1897.....	609,722	37 00	22,741,407
1898.....	626,488	38 00	24,114,412
1899.....	628,841	41 00	25,651,244

SHEEP.

Quite an increase over 1898 is noted in the number of sheep returned by assessors this year, the total number assessed being 722,347. The equalized value of sheep is very low, 72 cents per head, so at this valuation the sheep of the State were worth but \$520,089.

Twenty-two per cent. of the number assessed were marketed, or 158,903. Of this number 53,808 were in northern Illinois, 57,140 in central Illinois, and 47,955 in the southern division of the State.

The average live weight of the sheep marketed was 100 pounds, giving a gross weight of 15,913,172 pounds.

The average price of \$3.85 per hundred has not been equaled since 1892. The total value of the sheep marketed was \$615,120.

The supply of sheep on hand December 1, 1899, was 13 per cent. less than on December 1, 1898, and the average price at that time was \$3.75 per hundred.

In Stark county dwarf rape has proved an excellent late pasture for stock, especially for sheep, but they must be kept off of it when it is wet.

CROP REPORT.

25

The following table gives the number, weight and value of the sheep marketed in the State since 1855:

YEAR.	Assessors' Returns.		Estimated per cent. marketed.	Number fat sheep marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Value sheep marketed.

WOOL.

Some 50,000 pounds less wool was shorn in 1899 than in 1896, 2,318,544 pounds being reported this year, of which 873,181 pounds was shorn in northern Illinois, 866,178 in central Illinois, and 579,185 in the southern division of the State.

The average price obtained of 18 cents per pound was higher than for a number of years past, and the total value of the wool clip of 1899 was \$424,835.

The following table gives the number of pounds shorn, the price per pound, and the total value of the wool clip for the last twenty-three years:

YEAR.	Number pounds shorn.	Price per pound.	Total value.
1877.....	3,291,677	\$0 30	\$987,503
1878.....	2,891,087	25	722,752

HORSES.

There is still a deficiency in the number of horses in the State, as compared with the two preceding years, 915,323 having been returned by assessors. Of this number, 366,037 are in the northern division of the State, 349,443 in the central division, and 199,843 in the southern division. At the equalized valuation of \$8.19 per head, the horses of the State are worth \$7,496,495.

The number of colts foaled in 1898 was 71,382.

Distemper among horses has been reported from Lee, Putnam and Clark counties, and in Bond some horses have died from eating wormy and frost-bitten corn. In DeWitt county horses have been affected with something like influenza, which has proved fatal in some cases.

The following table gives the number of horses assessed in the State since 1855, and their equalized valuation, as well as the number of colts foaled each year since 1878:

YEAR.	Assessors' Returns.		Number colts foaled.
	Number.	Value.

1899.....	915,323	7,436,495

DAIRY PRODUCTS.

MILK.

According to the assessors' returns considerably less milk was sold in the State in 1899 than in 1898, the quantity for 1899 being 99,300,312 gallons. Over 95 per cent. of this amount was sold in northern Illinois—94,123,126 gallons; in central Illinois but 1,261 gallons were sold, and in the southern division of the State 3,915,125 gallons.

The price of milk varies very little, the 1899 price of 12 cents per gallon being but 1 cent higher than that of 1898. The total value of the milk sold in Illinois in 1899 was \$12,213,168.

The following table gives the amount, price and value of the milk sold in the State the last twenty-three years:

YEAR.	Gallons sold.	Price per gallon.	Total value.
1877.....	17,124,506	\$0 11 1-6	\$1,912,236

1898.....	144,513,107	11	16,178,881
1899.....	99,300,132	12	12,213,168

CREAM.

It is twenty years since so small a quantity of cream sold in Illinois has been reported by the assessors, whose figures for 1899 are 851,063 gallons.

Nearly half of this amount—403,430 gallons—was sold in the northern division of the State, central Illinois reporting 367,926 gallons, and the southern division 79,707 gallons.

The market price of cream December 1 was 63 cents per gallon, and the total value of cream sold in the State during the past year was \$535,633.

The quantity and value of the cream sold in the State since 1876 is given in the following table:

YEAR.	Gallons sold.	Price per gallon.	Total value.
1877.....	2,744,259	\$0 55	\$1,509,342
1878.....	62,707	52	32,608

1899.....	851,063	63	535,633

BUTTER.

Of the 14,812,464 pounds of butter sold in Illinois in 1899, 10,211,714 pounds were the product of the northern division of the State, the central division producing 3,049,443 pounds, and the southern division 1,551,307 pounds.

The average price of 20 cents per pound was a little higher than for the four preceding years, and the total value of the butter sold in the State was \$2,973,117.

In the following table will be found the quantity and value of the butter sold in Illinois during the past twenty-three years:

YEAR.	Pounds sold.	Price per pound.	Total value.
1877.....	18,970,227	\$0 20	\$3,794,045
1878.....	17,997,652	15	2,699,648

1896.....	16,332,425	17	2,796,015
1897.....	15,109,564	19	2,871,523
1898.....	15,682,179	18	2,892,439
1899.....	14,812,464	20	2,973,117

CHEESE.

Cheese is the only dairy product of which a larger quantity was sold in Illinois this year than last, 2,096,381 pounds being reported. By far the largest portion of this was produced and sold in northern Illinois—1,965,282 pounds. In central Illinois 90,593 pounds were sold, and in the southern division of the State 40,506 pounds.

The ruling price of cheese December 1 was 12 cents per pound. If all were sold at this price it would have returned to the dairymen \$261,838.

The following table shows the quantity and value of the cheese sold in the State since 1876:

YEAR.	Pounds sold.	Price per pound.	Total value.
1877.....	4,502,671	\$0 12	\$540,320
1878.....	5,139,914	10	513,691
1879.....	6,618,212	13	860,367
1880.....	6,187,680	13	803,398
1881.....	5,837,974	15	875,696

1898.....	1,198,169	12	139,202
1899.....	2,096,381	12	261,838

Tables published elsewhere in this report give, by counties, the quantity and value of the dairy products of the State for 1899:

SUMMARY.

The following table gives in small space the value of the principal farm products and live stock of Illinois for the year 1899:

Corn.....	\$67,791,697
Winter wheat	6,686,749
Spring wheat	485,564
Oats	28,377,878
Rye	751,290
Barley	158,738
Buckwheat	21,083
Hay	20,769,635
Timothy seed	213,597
Clover seed	195,477
Hungarian and millet seed.....	37,918
Irish potatoes	3,641,133
Sweet potatoes	206,972
Turnips and other root crops	99,896
Broom-corn	1,639,823
Sorghum	281,269
Beans	31,200
Castor beans.....	80,707
Tobacco	221,732
Other crops not named.....	169,931
Apples	507,033
Peaches	28,064
Pears	8,426
Grapes	28,752
Strawberries	40,065
Watermelons	38,638

Other fruits and berries	99,425
Wine	60,544
Honey	53,369
Horses (equalized value)	7,496,495
Beef cattle (equalized value)	9,491,273
Dairy cows	25,651,244
Hogs (equalized value)	2,349,046
Sheep (equalized value)	520,089
Wool	424,835
Milk sold	12,231,168
Cream sold	535,653
Butter sold	2,973,117
Cheese sold	261,833
Poultry sold	1,200,282
Eggs sold	1,009,628
Total	\$196,875,753

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent., is recorded 110; a decrease of five per cent. is marked 95, etc. The correspondence of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,
Secretary.

CROP REPORT.

CORN.

ILLINOIS CROP REPORT

:: FOR ::

MAY 1, 1900.

Synopsis of the Reports of Correspondents Upon the Acreage and Condition of the Growing Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,
SPRINGFIELD, May 1, 1900.

The information contained in this circular was obtained from the reports of correspondents mailed to this office the first of May.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past twenty-four years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number nearly six hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WINTER WHEAT.

The May 1 reports substantiate those of a month earlier as regards the condition of winter wheat, there having been a depreciation of but 4 points since April 1. The later reports give the May 1 condition as 85 per cent. of an average, while a year ago it was but 52 per cent.

In northern Illinois the condition is 90 per cent., in central Illinois 84 per cent., and in the southern division of the State 83 per cent.

About 14 per cent. of the area seeded last fall (295,346 acres) was winter-killed or otherwise destroyed, leaving 1,732,271 acres for harvest, more than 500,000 acres more than was harvested in 1899. The area winter-killed in the northern and southern divisions of the State was 12 per cent., and in the central division 17 per cent. The territory suffering most was that comprising the counties of Clark, Coles, Shelby, Clay, Effingham and Fayette, with an occasional isolated county in other sections of the State.

133200

In the following counties Hessian fly is reported, but the damage done by it is not large: Brown, Christian, Greene, Jersey, Morgan, Pike, Clay, Franklin, Massac and Monroe. In St. Clair county quantities of eggs have been deposited, which will cause great loss unless destroyed by parasites. The fall brood of fly did not do much damage here.

In Madison county some chinch bugs are appearing.

At this date the plant is pretty generally suffering for rain, but in Calhoun county some of the wheat on bottom land is so rank that it is lodging already.

On the whole the present prospect for wheat in this State is excellent.

SPRING WHEAT.

An increase of 4 per cent. in the area seeded to spring wheat this year as compared with last is reported, the entire spring wheat area being confined to the northern grand division of the State, with the exception of a small area in Vermillion county,

The May 1 condition of spring wheat is 96 per cent. of a seasonable average.

OLD WHEAT.

With the exception of 1897, the amount of old wheat in producers' hands May 1 of the succeeding year, is the smallest this year ever reported. In 1899, 11,054,736 bushels of wheat were produced in Illinois, of which 8 per cent., or 899,397 bushels remained in first hands the first of May.

The quantity of wheat produced last year was so small that there was a deficiency of 7,302,728 bushels of the amount absolutely needed for seed and for home consumption.

The following table gives the amount of old wheat in first hands the first of May, since and including 1880:

YEAR PRODUCED.	Crop in bushels.	Per cent. crop on hand following May 1.	Amount crop in producers' hands following May 1.	Surplus wheat above seed and consumption at harvest.	Deficit at harvest.
1880.....	56,508,309	15	8,476,246	39,851,883
1881.....	22,374,163	13	2,924,039	5,765,414
1882.....	52,823,261	15	8,174,634	36,214,133
1883.....	20,374,572	15	3,208,358	4,575,152
1884.....	34,367,493	18	6,350,202	17,367,794
1885.....	8,299,243	14	2,201,904	5,439,786
1886.....	28,284,068	15	4,000,931	12,082,999
1887.....	38,076,468	13	5,034,875	21,842,119
1888.....	33,916,920	12	4,022,569	17,334,947
1889.....	37,201,916	15	5,722,594	20,919,433
1890.....	13,608,504	12	1,580,903	2,002,400
1891.....	34,620,823	17	5,563,995	16,853,536
1892.....	30,578,543	18	5,428,060	13,086,069
1893.....	18,916,314	14	2,657,854	891,488
1894.....	41,315,099	13	5,512,379	23,288,962
1895.....	18,093,503	10	1,813,244	169,992
1896.....	21,514,561	9	2,012,437	3,683,784
1897.....	10,255,525	8	848,892	7,600,394
1898.....	18,383,943	9	1,635,451	563,474
1899.....	11,054,736	8	899,397	7,302,728
Average	27,503,399	14	3,903,448	14,665,699	5,586,327

RYE.

In northern Illinois 14 per cent. of the rye seeded last fall was winter-killed, and in the southern division 18 per cent., while in central Illinois but 6 per cent. was destroyed. The area for harvest will be 97,159 acres, a considerably smaller area than was harvested in 1899.

In Christian county there is some fly in the rye, and there, as in many other counties, the dry weather is injuring the crop to some extent.

OATS.

In both central and southern Illinois there has been quite an increase in the area sowed to oats this spring over last year, the increase in the former division being 8 per cent. and in the latter 6, while northern Illinois shows a decrease of 1 per cent. The average increase for the State is 4 per cent. In the following counties the increase is 20 per cent. or over: Hancock, Jersey, Macoupin, Pike, Bond, Fayette, Massac, Union, Wayne and White.

The May 1 condition of oats is 94 per cent. of a seasonable average in northern Illinois, 95 per cent. in central Illinois, and 91 per cent. in the southern division of the State, the State average being 93 per cent., which is much better than one year ago.

The season has been favorable to oat sowing, and there is every encouragement for the largest oat crop produced in Illinois for many years.

BARLEY.

An increase of 2 per cent. in the area sown to barley this year is reported, all but a very small area being located in the northern division of the State. The May 1 condition of the crop is 97 per cent. of a seasonable average.

OLD CORN.

The percentage of old corn in first hands on May 1, 27 per cent. of the 1899 crop, is below the average at this date, but the amount in bushels is above the average, it being estimated that 69,855,366 bushels are still in the hands of producers.

In the northern division of the State 41,587,764 bushels, 33 per cent. of the product, are in first hands; in the central division 20,849,442 bushels, or 20 per cent., are reported, while in southern Illinois but 7,418,160 bushels, 24 per cent. of the crop, still remains on the farm.

The following table gives the amount of old corn in the producers' hands May 1, the past twenty-one years as well as the extent of the crop produced each preceding year:

YEAR PRODUCED.	Crop	Per ct. corn on hand following May.	Bushels corn in producers' hands following May.
1879.....	305,913,277	32	99,229,889
1880.....	250,697,036	23	71,929,343
1881.....	174,491,706	21	37,445,964
1882.....	179,471,729	24	43,450,857
1883.....	186,583,558	21	39,478,621
1884.....	207,556,662	24	50,102,264
1885.....	230,922,298	24	57,047,027
1886.....	182,755,053	24	43,346,023

Average....	216,058,902	30	65,174,907

MEADOWS.

Meadows, particularly old clover meadows, have suffered severely the last two years, and while the area is not very materially reduced from 1899, it is very much less than two years ago. Not only have meadows suffered from the cold winters, but in a number of counties much damage has been done by a worm, something like a web-worm. Those counties suffering from this cause are Clark, Montgomery, Effingham and Jasper.

The 1900 area of meadows is estimated as 93 per cent. of that of 1899, it being 97 per cent. in northern Illinois, 89 per cent. in central Illinois, and 90 per cent. in the southern division of the State.

The May 1 condition of meadows is pretty uniform throughout the State, the average being 88 per cent.

In Kankakee county there is a disposition to change from timothy to millet, the yield of millet being more than double that of timothy.

Meadows, in common with other vegetation, need rain badly.

PASTURES.

Not quite so large an area as in 1899 will be devoted to pastures this year, but the deficiency is only 4 per cent. In the northern division of the State, the area is 93 per cent., in the central division 96, and in southern Illinois 93 per cent.

The May 1 condition of pastures is 89 per cent. of an average. In Jasper county the worm which is injuring meadows is also damaging pastures, and over most of the State they are needing rain. It has been so dry that they have not grown much, and could not afford food for stock.

SPRING WORK.

In northern Illinois the amount of spring plowing done this year is much below the average at this date, but 49 per cent. being reported as compared with 68 per cent. ordinarily.

In central Illinois rather more than usual has been done, 63 per cent. against a general average of 62 per cent., while in the southern division of the State 3 per cent. less than usual is reported.

Taking the entire State into consideration, the amount of spring work done at this date is 6 per cent. less than usual—67 per cent. being the usual amount.

The soil generally is in very good condition, breaking up well, but in some sections it is cloddy and hard to work.

LIVE STOCK.

HORSES.

In a few counties there has been some distemper and pink-eye among horses, those reporting the former being Grundy, Will, Winnebago, Calhoun, Douglas, Moultrie, Effingham and Hamilton, but not many fatalities have resulted. Pink-eye is reported from Grundy, Kendall, Whiteside, DeWitt, Moultrie and Piatt counties. In Henderson, Winnebago, Johnson and Pulaski counties a number of horses have died suddenly from some unknown cause. In some cases the cause is thought to be eating wormy corn. In Grundy and Morgan counties there have been some cases of spinal meningitis.

Considerable trouble has been experienced this season from abortion, and many mares have lost their foals in Whiteside and Moultrie counties, and in Clay mares have not done well at foaling time.

The number of horses in the State is estimated as 9 per cent. less than a year ago, and their condition on May 1 is 97 per cent. of an average.

MULES.

In a few counties in the State there is a slight increase in the number of mules as compared with 1899, but throughout the State as a whole there is a deficiency. The greatest loss is in southern Illinois, where the proportion of mules has always been largest, but 88 per cent. of the 1899 number being reported, while the State average is 91 per cent. In Douglas county there is a tendency to use mules for farm work instead of horses.

In DeWitt county mules have suffered somewhat from influenza, but no other disease has been reported among them, and their general condition is 98 per cent. of a seasonable average.

CATTLE.

While some counties report a considerable increase in the number of cattle on hand May 1, as compared with that date a year ago, the State average is but 95 per cent., which is the number in northern Illinois, central Illinois reporting 96 and southern Illinois 94 per cent. of last year's number.

In Effingham county there has been a few cases of pink-eye among cattle, and in Kane some tuberculosis, while Lee county reports some "lumpy jaw."

In Henderson county a few cows have died in from twenty-four to thirty-six hours

after calving, while in McHenry and Whiteside counties there is much complaint of abortion. In McHenry county calves have also been troubled with scours.

Owing to lack of early pasture, cattle as well as other stock, are somewhat thin in flesh, but their May 1 condition is 97 per cent. of an average.

DAIRY COWS.

Both the number and condition of dairy cows on May 1 was 97 per cent., being about the same all over the State.

HOGS.

In northern Illinois the number of hogs on hand May 1 as compared with last year was 90 per cent.; in central Illinois it was 87 per cent. and in the southern division of the State 85 per cent., the State average being 87 per cent.

In Fulton, Greene, Macoupin, Montgomery, Morgan and Sangamon counties some hog cholera is reported, while in Lake county a good many hogs are dying from some disease other than cholera.

The general condition of hogs is good, 97 per cent. of an average, 98 per cent. being reported from the northern division of the State, 97 per cent. from the central division, and 96 per cent. from southern Illinois.

SHEEP.

In northern Illinois the number of sheep on hand May 1 was 3 per cent. less than a year ago; in central Illinois the deficiency is 4 per cent., and in the southern division of the State 9 per cent., the State average as compared with a year ago being 95 per cent.

No complaints of disease among sheep have been reported, and their May 1 condition is almost a full average, 98 per cent.

FRUIT.

There has been an unusually large amount of bloom on fruit of nearly every kind this spring, and the present prospect for an abundant yield is very encouraging. Raspberries seem to be about the only exception, they being reported injured or killed in Kane, McHenry, Morgan and Madison counties. In McHenry county grapes did not winter well, and in Morgan the blackberries were winter-killed, and strawberries were injured in Madison county.

GENERAL FARM NOTES.

The dry weather this spring has retarded the growth of vegetation, and everything has suffered somewhat from this cause. But little change in farm methods is noted in northern Illinois this spring. Lake county reports that there will be a good deal of rape sown, and in Lee county fifty per cent. more Irish potatoes than last year will be planted.

In central Illinois there is a marked tendency to go into broomcorn more extensively. Clark county reports that much of the wheat and meadow land will be put into corn and broomcorn this season. Cumberland, Moultrie, Edwards, Effingham, Jasper and Wayne there will be an increased area of this plant, and in Coles twice as much as last year will be planted. In Morgan county a larger area of Irish potatoes will be planted, and in Tazewell more sugar beets and tomatoes.

In the southern grand division of the State, more interest is taken in stock or cow peas, which will receive increased attention in Bond, Franklin, Hamilton, Hardin, Jefferson (where the tendency is to change from oats to peas), Johnson, Madison, Massac, Monroe, Pulaski, Randolph, Richland, Washington and Williamson. This legume will be used both for pasturage for cattle and hogs and as a fertilizer.

In Richland county an increased area will be devoted to soja beans and to sorghum.

WAGES PAID FARM HAND.

A deficiency of 10 per cent. in the needed supply of farm hands is reported this year. In some sections most of the hands have gone into the mines, while the drainage canal has absorbed many of the men along its line and vicinity.

The wages paid farm hands vary very little from year to year.

The average wages paid farm hands during the past twenty-one years in the three grand divisions of the State, are given in the following table:

DIVISION.	PER DAY.		PER MONTH.	
	With board.	Without board.	With board.	Without board.
Northern.....	\$1 00	\$1 25	\$19 55	\$27 25
Central	85	1 10	17 80	24 35
Southern.....	65	90	14 40	20 45
Average.....	\$0 85	\$1 10	\$17 25	\$24 00

The wages paid farm help in the three divisions of the State, during the past twenty-one years, is given in the following tables:

NORTHERN DIVISION.

YEAR.	PER DAY.		PER MONTH.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value

of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent., is recorded 110; a decrease of five per cent. is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,
Secretary.

ILLINOIS CROP REPORT

: : FOR : :

JUNE 20, 1900

Synopsis of the Reports of Correspondents Upon the Acreage and
Condition of the Growing Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,
SPRINGFIELD, June 20, 1900.

The information contained in this circular was obtained from the reports of correspondents mailed to this office the twentieth of June.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past twenty-four years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number nearly six hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

CORN.

An increase of 3 per cent. over 1899 is reported in the area planted to corn this year in the central division of the State. About the same area as last year is reported in the northern division, while in southern Illinois there is a deficiency of 2 per cent., thus making the State area just about the same as last year, when 6,941,543 acres were reported.

The June 20 condition of the crop, 92 per cent. of an average, is rather better than usual, and much better than a year ago at this date. In northern Illinois it is 94 per cent. of an average, in central Illinois 96 per cent., and in the southern division 86 per cent. In this section of the State excessive rains have injured the corn, in some instances the high water in the streams covering hundreds of acres of corn land and greatly injuring the plant. In a number of the southern counties it has been too wet to cultivate the corn, so that the weeds are getting a start.

189208

Cut worms, wire worms, root grub, corn louse and large ants have all damaged corn to some extent, but not enough to materially affect the crop, and but little corn has had to be replanted.

In Tazewell county corn is not doing well on ground used for sugar beets last year. Whether this is merely an accident, which would not occur again, or whether the beets do exhaust the vitality of the soil, is a question which can be decided only by repeated experiments.

The seed used this year was nearly a full average as to quality—97 per cent.—and should prove an important factor in the outcome of the crop.

The first appearance of corn above ground was on April 1 in Hardin county; in central Illinois its first appearance was April 8, in Sangamon county, while in the northern grand division it was April 25, in Stark county.

BROOM-CORN.

The high price of broom-corn last year induced the growers to largely increase their area this season, and many others will plant this crop this year for the first time. In but two counties in the State, Mercer and Mason, is the 1900 area less than that of 1899, and there only 10 per cent. less. In northern Illinois the area is 3 per cent. greater than a year ago, in central Illinois it is 42 per cent. greater, and in the southern division the increase amounts to 64 per cent. The counties reporting the largest increase are Cumberland, where the area as compared with 1900 is 462 per cent., and Effingham, where five times as much as last year has been planted. Neither of these counties is among the largest broom-corn counties of the State, however, so even this increase will not make a very large increase in the total area, which last year was 24,655 acres.

The June 20 condition of the crop was 94 per cent. of an average in northern and central Illinois, and 91 per cent. in the southern division.

SORGHUM.

The area devoted to this crop in the northern division of the State this year is 5 per cent. less than in 1899; in the central division it is 8 per cent. less, and in southern Illinois 7 per cent. less.

The June 20 condition of the crop is 95 per cent. of a seasonable average in northern and central Illinois, and 91 per cent. in the southern division.

WINTER WHEAT.

The encouraging outlook for wheat on May 1 has not continued during the past six weeks; on the contrary there has been a decided depreciation, and the June 20 condition of the crop is 18 points below that of May 1, and but 67 per cent. of a seasonable average. In northern Illinois the June 20 condition is 75 per cent. of an average, in central Illinois 61 per cent., and in the southern division of the State 65 per cent.

The principal cause of this deterioration is the Hessian fly, which has been unusually plentiful and active lately, with the result that many fields have been plowed up and planted to other crops, generally to corn, or have been pastured. Nearly every county in central and southern Illinois has suffered seriously from this pest. A few chinch bugs are reported in some sections, but they have not done much damage to wheat. In southern Illinois, and in a few counties in the central division of the State, the excessive rains have either caused the wheat to lodge,

so it can not be cut, or have made the ground so wet that the harvesters can not get into the fields. On the whole the prospect for the wheat growers of this State is about as discouraging as ever known at this date.

Harvesting has begun in most counties in the southern division of the State, and in about one-half of the central counties, but as no threshing has been done, it is impossible to form an estimate of the probable yield per acre. Massac county took the lead this year as regards harvesting, cutting having begun June 8.

SPRING WHEAT.

The June 20 condition of spring wheat is encouraging for 91 per cent. of an average yield per acre.

OATS.

There is now every prospect for an unusually large oat crop this year, the area sown being 4 per cent. greater than in 1899, and the condition of the crop 98 per cent. of a seasonable average, and quite uniform throughout the State. A few counties report some louse in oats, but it is not likely to do much harm now. The greatest damage to be apprehended is from lodging, as in many counties they are very rank and heavy, and in a number of localities are already down.

RYE.

This crop has just about held its own during the past six weeks, and its June 20 condition is 91 per cent. of a seasonable average—just 10 per cent. better than on this date last year.

BARLEY.

The June 20 condition of barley is 1 per cent. higher than that of May 1, and is encouraging for 98 per cent. of an average yield per acre.

MEADOWS.

There has been no improvement in the condition of meadows since May 1, the State average at this date being but 86 per cent. of a seasonable average. In northern Illinois the June 20 condition is 83 per cent., in central Illinois 84 per cent., and in the southern division of the State 81 per cent. For the past two years meadows in many parts of Illinois have had a hard struggle for existence, but new meadows this year have done fairly well. It has been very dry in northern Illinois this spring, which will cut the hay crop in that section short, while in the southern and south central portion of the State the heavy and frequent rains have accelerated the growth of weeds.

In Kankakee county some insect has been at work at the roots of timothy, and in Cumberland a black, hairy worm has killed many meadows. In Randolph and Jasper counties also worms have injured the meadows, and in Crawford the grass maggot is reported.

CLOVER.

The area in clover this season is 12 per cent. less than last year. In northern Illinois the deficiency is but 4 per cent., but in central Illinois it is 15, and in the southern division of the State 28 per cent.

In the northern division of the State the June 20 condition of the crop is much better than a year ago, being 83 per cent. of a seasonable average; in the central division it is 85 per cent. of an average, while in southern Illinois it is but 74 per cent. of an average.

HUNGARIAN AND MILLET.

In northern Illinois the area devoted to Hungarian and millet this season is but 1 per cent. less than a year ago, but in central Illinois there is a deficiency of 4 per cent., and in the southern division of the State of 9 per cent., the State average being 95 per cent. as compared with 1899.

PASTURES.

Pastures have improved somewhat in condition during the past six weeks, their June 20 condition being 92 per cent. of a seasonable average. The improvement has been quite general over the State, in spite of the fact that there has been almost a drought in the northern division of the State, and in Boone and McHenry counties farmers have been obliged to turn their stock into the meadows, while in Jo Daviess county pastures are said to be failing fast. In Hardin county the dry weather in May injured the pastures, but the recent rains have revived them. In Adams county wire grass is driving out the tame grass in some pastures.

IRISH POTATOES.

Quite as large an area was planted to Irish potatoes this year in the northern and southern divisions of the State as in 1899, while in central Illinois an increase of 1 per cent. in the area is reported. In northern and central Illinois the June 20 condition is encouraging for 98 per cent. of an average yield per acre, while in southern Illinois a full yield may be expected.

Potato bugs are reported from Whiteside, Hardin and Richland counties.

SWEET POTATOES.

In the northern division of the State but 88 per cent. of the 1899 area is devoted to sweet potatoes this year. The greatest deficiency is in Whiteside county, where the area as compared with last year is but 45 per cent. In central Illinois the area is 4 per cent. less than a year ago, and in southern Illinois 3 per cent. less.

The June 20 condition of the crop is 95 per cent. of a seasonable average, being 94 per cent. in northern Illinois, 95 per cent. in central Illinois, and 96 per cent. in the southern division of the State.

TOBACCO.

In northern Illinois an increase over 1899 of 5 per cent. in the area devoted to tobacco is noted, but in the central division there is a decrease of 10 and in the southern division of 6 per cent.

The June 20 condition of the crop is 97 per cent. of a seasonable average.

FIELD BEANS.

There has been no increase in the area planted to field beans this year, the area in northern and southern Illinois as compared with 1899 being 95 per cent., and in the central division of the State 98 per cent.

The June 20 condition of the crop was 96 per cent. of an average in the northern grand division, and 95 per cent. in the central and southern divisions.

FIELD PEAS.

This new crop seems to grow in favor each year in the southern portion of the State, where nearly every county reports an increased area. In White county more than twice as large an area was sown as in 1899, and the average increase in this section was 11 per cent.

Not nearly so many counties report this crop in central and northern Illinois as in the southern division of the State, but there is a slightly larger area than last year—2 per cent.—in the central division, though northern Illinois reports a deficiency of 8 per cent.

FRUIT.

There is considerable complaint of apples falling in many counties in the State, but in most instances enough still remain to make a very fair crop. The counties reporting thus are McHenry, Calhoun, Christian, DeWitt, Greene, Macoupin, Montgomery, Morgan, Piatt, Schuyler, Shelby, Gallatin, Jefferson, Massac, Pope, Pulaski, Randolph and Richland. In White county many apple and pear trees are dying. Pears are said to be falling in Christian and Piatt counties, plums in Macoupin and Piatt, and peaches in Piatt. In McHenry and Clay counties canker worms did much damage in unsprayed orchards, but where well sprayed with blue vitrol, lime or Paris green little or no injury is reported.

Small fruit is said to be drying up in Henry county.

CHERRIES.

The yield of cherries was but 75 per cent. of an average in northern Illinois; in central Illinois 95 per cent., and in the southern division of the State 78 per cent. In the counties of Henry, Stephenson, Woodford and McLean, the cherries are very wormy.

STRAWBERRIES.

In the northern division of the State the strawberry crop was 10 per cent. below an average; in the central division the deficiency was 6 per cent., and in southern Illinois 16 per cent.

RASPBERRIES.

Although earlier reports indicate that the raspberry vines were either winter-killed or very badly injured, the yield has been about as large as that of other berries, being given as 93 per cent. of an average in northern Illinois, 89 per cent. in central Illinois, and 84 per cent. in the southern division of the State.

GOOSEBERRIES.

While the yield of gooseberries was better this year than last, it was not up to an average, being 85 per cent. of an average in northern Illinois and 87 per cent. in the other sections of the State. In Macon county a worm has been eating the leaves of both gooseberries and currants. In Jefferson county many of the gooseberry bushes did not bloom.

CURRANTS.

A very small yield of currants is reported this year, only 79 per cent. of an average in northern Illinois, and 76 per cent. in the southern division, central Illinois reporting 86 per cent. Currant worms were bad in Knox county.

VINEYARDS.

There is a deficiency in the area of vineyards in northern Illinois this year as compared with 1899 of 10 per cent., in central Illinois of 2 per cent., and in the southern division of the State of 6 per cent.

The June 20 condition of grapes is but 80 per cent. of a seasonable average in the northern division, 75 per cent. in the central, and 93 per cent. in the southern. In Jefferson county the grapes blighted.

YOUNG LIVE STOCK.

PIGS.

Although the number of young pigs is still below the average in most counties of the State, and the State average is but 91 per cent. of the normal, the condition of this class of live stock is excellent, being 99 per cent. of an average in northern Illinois, 97 per cent. in central Illinois, and 98 per cent. in the southern division of the State.

No complaints of disease of any kind among pigs have been received.

LAMBS.

In northern Illinois the number of lambs reported this spring is but 2 per cent. below the average, but in the central division the deficiency is 6 and in the southern division 7 per cent. The general condition of lambs is good, 98 per cent. of an average.

CALVES.

In the northern and central divisions of the State nearly an average number of calves—99 per cent.—is reported, but in the southern division there is a deficiency of 5 per cent.

Their condition is 98 per cent. of an average, taking the entire State into consideration.

In Carroll county calves suffered from scours while cows were on dry feed.

COLTS.

The rise in the prices of horses has stimulated breeding, and in northern Illinois a majority of the counties report an increase in the number of colts this spring. Cook county reports twice as many as last year, and McHenry an increase of 67 per cent., the average increase for this division being 5 per cent. While there is a deficiency of 4 per cent. in the central division, and of 5 in the southern, there are still many counties in these sections which have felt the stimulus of higher prices and report a larger number of colts.

The condition of colts June 20 lacked but 1 per cent. of being perfect.

In Will county there has been a good deal of sickness among horses, but the cause is unknown.

An index of the increased interest in horses is seen in the average value at weaning time, and the cost of service of stallions. In the northern division the average value at weaning time is \$28, and in both the other divisions \$27, giving a State average of \$27, against \$24 in 1899. The average cost of service in northern Illinois

this year is \$10, in central Illinois \$9, and in the southern division \$8, while in 1899 the State average was \$8.

There has been a greater mortality among colts in northern Illinois this spring than in other portions of the State, 8 per cent. having been lost prior to weaning, while in central Illinois the loss was but 5, and in southern Illinois 4 per cent.

WOOL.

The wool clip of 1900 was **1 per cent.** larger than in 1899 in the northern division of the State, 1 per cent. smaller in the central division, and 6 per cent. smaller in southern Illinois.

GENERAL FARM NOTES.

While from one section or another of the State reports have been received of the presence of nearly every insect pest known to the farmer, the total damage of all combined has been small, excepting the Hessian fly, which has proved so unconquerable a foe. In the notes on the various crops, most of these have received due attention. From Kane county comes a report that a worm similar to those on apple trees is injuring the oak and hickory trees by destroying the leaves. Squash bugs have done some injury in Knox and McHenry counties.

The northern division of the State is experiencing a drought, and many crops are suffering for water, while exactly the opposite condition prevails south of the center of the State, where continued rains and standing water are retarding farm work and injuring the grain. In Jo Daviess county the streams are nearly all dry, and the wells are unable to supply stock with water.

Renewed interest is manifested in tile drainage, special mention of it being made by correspondents in Grundy, Knox, McHenry, Mercer, Stark, Warren, Whiteside, McDonough, Montgomery, Piatt, Sangamon and Wabash.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent., is recorded 110; a decrease of five per cent. is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,

Secretary.

SQUASH BUG PROTECTION.

Inquiry having been made by some of our correspondents in regard to protection against this insect, Prof. S. A. Forbes, State Entomologist, sends the following, which is copied from an article published last year by the U. S. Department of Agriculture:

"This squash bug, particularly the adult, is unusually resistant to insecticides. A wash strong enough to kill the mature insect will at the same time destroy the vines. This renders it necessary to employ hand and cultural methods.

A number of the remedies in use against the striped cucumber beetle, as already outlined in Circular No. 31, second series, will assist in the destruction or control of the common squash bug. Protection of young plants with coverings; repellents, such as lime plaster or gypsum saturated with kerosene or turpentine; planting an excess of seed to distribute attack; stimulating the growth of the plants by manure or other fertilizer, and, lastly, clean cultural practice.

If the precaution be observed of gathering the vines as soon as the crop is harvested and burning them, many bugs in their different stages will be destroyed and the crop of insects reduced for the ensuing year.

Of other methods in general use against this species, are hand-picking early in the season and the trapping of the bugs by means of boards, pieces of bark or similar material, placed about on the ground in the garden."

AREA AND CONDITION OF CORN.

ILLINOIS CROP REPORT

: : FOR : :

AUGUST 1, 1900.

Synopsis of the Reports of Correspondents Upon the Acreage and Condition of the Growing Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,
SPRINGFIELD, August 1, 1900.

The information contained in this circular was obtained from the reports of correspondents mailed to this office the first of August.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past twenty-four years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number nearly six hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WHEAT.

Although the damage done to winter wheat by Hessian fly was very great, the outcome of the harvested crop was better than was anticipated. Twenty-three per cent. of the area seeded last fall was destroyed, much the largest proportion being in the central division of the State where 34 per cent. of the area was lost and but 731,351 acres left for harvest. In northern Illinois 21 per cent. of the area seeded was destroyed, leaving 34,055 acres for harvest, and in the southern division 854,400 acres were harvested, but 11 per cent. of the area seeded being destroyed. The area devoted to spring wheat was 91,288 acres, making the total wheat area harvested 1,711,094 acres.

The yield per acre on the area harvested exceeded the highest expectations, being 13 bushels, which is about the normal yield. The total yield of 22,006,632 bushels, is the largest reported since 1894.

CROP REPORT.

The quality of the wheat berry as a rule is excellent, and the prevailing price August 1, of 68 cents per bushel makes the value of the 1900 wheat crop \$15,035,379, the best returns for six years.

Heavy rains just after harvest caused wheat to sprout in the stock in Christian, Macoupin, Piatt and Crawford counties. In St. Clair county, the bearded varieties of wheat withstood the fly much better than the smooth ones.

The following table gives the area, yield and value of the wheat crop of the State during the last forty-one years.

WHEAT (SPRING AND WINTER.)

YEAR.	Number of acres harvested.	Average yield per acre-bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

WHEAT CONSUMPTION.

In estimating the amount of wheat required in the State for seed and bread, it is necessary to consider the entire area seeded instead of that harvested, as the amount required for seed is based on the area seeded last year, which was 2,200,840 acres.

As one and one-third bushels per acre is used for seed, it will take 2,934,464

bushels for that purpose, and allowing 4 bushels per capita for food, 18,205,752 bushels will be required for that purpose, which leaves 3,800,840 bushels for export.

OATS.

The area devoted to oats this year, 4,065,202 acres, is the largest ever reported in the state. Over one-half of the acreage, 2,078,258 acres is in northern Illinois, central Illinois reporting 1,228,802 acres, and the southern division of the state 758,142 acres.

The average yield per acre in the northern and central divisions was 43 bushels, but 30 bushels per acre being harvested in the southern division. The state average was 40 bushels per acre, and the total oat crop amounted to 164,909,129 bushels, the largest oat crop ever produced in Illinois.

The average price per bushel August 1, was 20 cents, and if the entire crop had been sold at that price it would have returned to the producer \$33,016,044.

The only serious damage to oats this season was that caused by lodging, in some instances it not being possible to cut them at all, and in others only one way. Had it not been for this the 1900 oat crop would have been an even more pronounced record breaker than it was.

In Christian and Clark counties oats were damaged by rain, some sprouting in the stock. In McHenry county some farmers are sowing oats and wheat together, in the proportion of one-fourth wheat and three-fourths oats. The wheat was extra good, though the heads of both grains were short.

The following table gives the area, yield and value of the oat crop of the State during the past forty-one years.

YEAR.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of the oat crop in each county in the State this year.

RYE.

In spite of a deficiency in the area seeded to rye last fall, (but 107,971 acres being reported) the average yield per acre of 17 bushels makes the total yield of 1,825,216 bushels, larger than for the two preceding years. Northern Illinois produced most of the rye raised in the State, 1,476,903 bushels, central Illinois producing but 275,705 bushels, and the southern division of the State but 72,608 bushels.

The average price per bushel on August 1 was 47 cents, the best price received for this grain since 1892. The value of the crop, on this basis, in the northern division of the State is \$702,678; in the central division \$126,922, and in southern Illinois \$35,518, the State value being \$865,118.

The following table gives the area, yield and value of the past forty-one rye crops grown in the State.

YEAR.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of rye in each county in the State.

BARLEY.

Not since 1891 has the area of barley in Illinois been so large as this year, when 25,878 acres are reported, of which 24,079 acres were in northern Illinois, neither of the other divisions reporting as much as 1,000 acres.

The average yield per acre was 27 bushels, the total crop amounting to 694,698 bushels.

The average price per bushel, August 1, 37 cents, is higher than on corresponding date for the last five years, the total value of the crop being \$257,731.

The following table gives the area, yield and value of the past forty-one barley crops produced in this state.

YEAR.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

In a table published elsewhere in this report will be found the area, yield and value of the barley crop in the State by counties.

HAY.

The area in meadows this year is the largest since 1889, there being 2,994,589 reported. Nearly half of this acreage, 1,220,071 acres, is in northern Illinois, central Illinois reporting 1,130,177 acres, and the southern division of the State 644,341 acres.

While the yield of hay is a little better this year than last, the State average of 1.3 tons per acre is not quite up to the normal. In the northern division of the State the total yield was 1,590,582 tons; in the central division 1,518,415 tons, and in the southern division 763,693 tons, the total hay crop of the State amounting to 3,872,690 tons.

The yield of clover this year was one and one-half tons per acre, and its quality 30 per cent. of an average.

The area, yield and value of the hay crop of 1900 for each county in the State is given in a table published elsewhere in this report.

Prices are a little better this season than for several years past, the State average on August 1 being \$7.05 per ton. The highest price per ton was in the southern division of the State, where the ruling price August 1 was \$7.70 per ton; in the northern division the price was \$7.20, and in the southern division \$6.55. Owing to the large yield and the high prices, the value of the 1900 hay crop of Illinois exceeds that of any hay crop since 1888, it amounting to \$27,316,014. Of this amount \$11,474,634 should be credited to northern Illinois, \$9,953,716 to central Illinois, and \$5,887,664 to the southern division of the State.

The following table gives the area, yield and value of the past forty-one hay crops of the State.

YEAR.	Number of acres.	Average yield per acre—tons.	Tons produced.	Price per ton.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

CORN.

A much larger area of corn is reported this year than last, 8,051,304 acres being reported. Of this area 3,192,413 acres are in northern Illinois, 3,480,589 acres in central Illinois and 1,378,297 acres in the southern division of the State.

In the northern grand division the August 1 condition of corn is nearly a full average, 99 per cent. the condition in a number of counties being 105 per cent. In one of these, Stark county, one correspondent states that two ears on a stalk are common. In Kankakee county corn is beginning to fire and in Lee it is very thin on the ground, there being but one stalk in a hill in many places.

While the average condition in central Illinois is not quite so good as in the northern section of the State, 97 per cent., the two counties making the most encouraging reports are in this division, Champaign with an August 1 condition of 115 per cent. and Montgomery, 112 per cent. In Adams county many stalks are said not to have even a sign of an ear, and the plant is firing at the root some. In Christian county also it is firing, while in Shelby county corn on low ground is drowned out. The only complaint in regard to injury from chinch bugs comes from Mason county but the damage is not great. From Logan county comes some complaint of too many shoots on corn.

In southern Illinois the August 1 condition of the crop is not so encouraging as in the other parts of the State, 87 per cent. being the average condition. In Gallatin county, where the condition is but 50 per cent. of a seasonable average, the corn has been injured by wet weather.

With so large an acreage, and such a fine August 1 condition, the prospect is encouraging for one of the largest corn crops ever produced in Illinois

BROOM CORN.

The August 1 condition of this crop is 2 points better than our last report, being 96 per cent. of a seasonable average, but in the southern division it has deteriorated 6 points, since June 20, the August 1 condition being but 85 per cent.

SORGHUM.

This crop has improved during the last six weeks in northern Illinois, the August 1 condition being 98 per cent. of a seasonable average, but it has depreciated slightly in both of the other grand divisions, the condition of the crop in central Illinois being 94 per cent. and in the southern division of the State 90 per cent. The average condition on August 1 for the entire State is 94 per cent. of a seasonable average.

PASTURES.

The condition of pastures August 1, 93 per cent. of a seasonable average, is a slight improvement since June 20, and is better than on this date last year.

The poorest condition is reported from northern Illinois, where the lack of rain has hindered their growth, and they are but 89 per cent. of a seasonable average. A little better condition is reported from the central division of the state, where the August 1 condition is 91 per cent. while in the southern grand division where copious and frequent rains have fallen, the August 1 condition is 99 per cent. of a seasonable average.

IRISH POTATOES.

The condition of Irish potatoes is not so good as on June 20 by 4 points, and is 2 points below their August 1, 1899, condition.

In northern Illinois their August 1 condition is 90 per cent. of a seasonable average; in central Illinois it is 97 per cent. and in the southern division of the state 98 per cent.

SWEET POTATOES.

The August 1 condition of this crop is encouraging for 94 per cent. of an average yield per acre, and is quite uniform throughout the State, the average condition in each of the grand divisions being the same.

BUCKWHEAT.

In northern Illinois, where most of the buckwheat raised in the State is produced, there is a deficiency in area as compared with 1899 of 9 per cent; in central Illinois the deficiency is 3 per cent. and in the southern division of the State, 10 per cent. The August 1 condition of the crop is 95 per cent. of a seasonable average in the northern division of the State, 86 per cent. in the central division, and 93 per cent. in the southern division.

TURNIPS AND OTHER ROOT CROPS.

In northern Illinois the area devoted to root crops this year is 1 per cent. less than in 1899, and their August 1 condition is 98 per cent. of a seasonable average. In both the central and southern grand divisions the area is 95 per cent. as compared with last year, and their condition 96 per cent.

TOBACCO.

The August 1 condition of tobacco is 95 per cent. in each of the grand divisions of the State.

CASTOR BEANS.

In both northern and central Illinois the August 1 condition of castor beans is 95 per cent. of a seasonable average, but is only 90 per cent. in the southern division of the State.

FIELD PEAS.

In the northern and southern divisions of the State the August 1 condition of the crop is 96 per cent. of a seasonable average, but is only 92 per cent. in central Illinois.

FIELD BEANS.

More interest is taken in field beans than in peas in this State, a good many more counties reporting on them in northern and central Illinois, where their August 1 condition is 95 per cent. In the southern division of the State their August 1 condition is but 83 per cent. of a seasonable average.

In Richland county farmers generally are raising soja beans and cow peas.

FRUIT.

APPLES.

The condition of the apple crop is rather discouraging being but 73 per cent. of a seasonable average. In northern Illinois the August 1 condition is encouraging for 85 per cent. of an average crop, but in the central and southern divisions of the State it is but 69 and 65 per cent. respectively.

In common with most of the other fruits apples bloomed profusely last spring, but great quantities of the young fruit have fallen, and much of what remains is wormy or knotty.

In Mason county the apple trees are blighting worse than ever before.

PEACHES.

In northern Illinois the August 1 condition of peaches is 70 per cent. of a seasonable average; in central Illinois it is 86 per cent. and in the southern division of the State 68, the State average being 74 per cent.

Peaches are falling badly in Douglas county.

PEARS.

The August 1 condition of pears is 79 per cent. of a seasonable average in northern Illinois and 81 per cent. in the central division, but in the southern division of the State in central Illinois and 75 per cent. in the southern division of the State.

PLUMS.

In northern Illinois the August 1 condition of plums is encouraging for but 76, and in the southern division 77 per cent. of an average crop, but in central Illinois 91 per cent. of an average crop may be expected. In Christian county plums are falling badly.

QUINCES.

About 85 per cent. of an average crop of quinces may be expected this year, northern Illinois promising a full average, while 84 per cent. of a crop is anticipated in central Illinois and 75 per cent. in the southern division of the state.

GRAPES.

This fruit is much more promising than last year, but its August 1 condition is but 80 per cent. of an average. The poorest condition prevails in the northern division of the State, where it is but 73 per cent. of an average; in central Illinois 91 per cent. of an average yield is anticipated, and in the southern division 77 per cent.

Grapes are rotting badly in Douglas, Montgomery, Massac and Pulaski counties.

BLACKBERRIES.

The 1900 yield of this fruit was 10 per cent. below the normal in northern Illinois and 14 per cent. in central Illinois, but in the southern division nearly a full average yield, 98 per cent. is reported.

LIVE STOCK.

Pinkeye has prevailed to some extent among horses, cattle and hogs. In Carroll county all three classes of live stock have been affected by it, and in Whiteside both horses and cattle, where it causes blindness, while it has been confined to cattle in DuPage, Grundy, LaSalle, Mercer, Putnam, Stark, Woodford and McLean counties. Horses alone have been affected by the disease in Kankakee county.

The disease is not usually fatal, but in many cases it causes temporary and sometimes permanent blindness.

There has been some blackleg in Henderson county, where whole herds have been vaccinated.

In Grundy, Macon and Greene counties some horses have had catarrhal fever, while distemper is reported from Logan, Menard, Jefferson and Johnson counties. In Monroe old horses are affected with a new disease similar to distemper, except that it begins with a dry cough.

A large number of colts have died from tetanus in Whiteside county. In Clark county some horses have been affected by a mouth disease, but there have been no fatal cases.

The horn fly has been very annoying to cattle in McHenry, Christian, Douglas and Jefferson counties. There has been some fatal sickness among hogs in Warren and Hancock counties.

A few cattle have died in Hardin county.

DRAIN TILE.

During 1899 there were 9,325,147 feet of drain tile reported laid in Illinois, much the greater portion of it being laid in the northern portion of the State, 7,915,725 feet in central Illinois 1,407,722 feet were laid, and in the southern division of the State but 1,700 feet. The total number of feet now laid is 713,900,551 feet.

The average number of feet per acre in cultivated land of northern Illinois is 33, the largest number reported being 99 feet in Livingston county.

In the central division of the State the average number of feet is 20, the largest number being 85 in Douglas county.

In the southern division the average is but 1 foot per acre, many counties reporting less than 1, and 4 feet in Wabash and White counties being the highest. There is no doubt but that much more tile than is reported has been laid in this section of the State, but the figures have not been returned to us.

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent., is recorded 110; a decrease of five per cent. is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,
Secretary.

ILLINOIS CROP REPORT

: : FOR : :

DECEMBER 1, 1900.

Synopsis of the Reports of Correspondents Upon the Acreage and Yield of Crops, Etc.

ILLINOIS STATE BOARD OF AGRICULTURE,
SPRINGFIELD, December 1, 1900.

The information contained in this report as to the acreage of crops and number of head of live stock was obtained from the reports of assessors made to this Department as required by law.

The data in regard to yield per acre, price of crops and value of crops and live stock was obtained from crop correspondents, who number nearly six hundred, and represent every section of the State.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past twenty-four years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WINTER GRAIN.

WHEAT.

The area seeded to wheat last fall is 11 per cent. smaller than the area of the 1900 crop, or 230,662 acres. The deficiency in both the northern and southern divisions of the State is 8 per cent., while in central Illinois it is 14 per cent.

The area, as estimated by crop correspondents, is 39,718 acres in northern Illinois, 957,358 acres in central Illinois, and 881,827 acres in the southern division of the State, the entire area seeded comprising 1,878,903 acres.

The December 1st, condition of the crop is 2 points above an average in the northern division, but 6 points below in the central and 7 points in the southern division.

Hessian fly has already done considerable damage to the crop, though many farmers delayed seeding as late as possible in order to avoid this pest. Its principal

work so far has been in the early wheat, but if it gets established there it will get into the later crop in time.

The counties reporting injury from this pest are: Henderson, Adams, Brown, Cass, Christian, Fulton, Greene, Hancock, Jersey, Logan, Macon, Macoupin, Mason, Menard, Montgomery, Morgan, Pike, Sangamon, Schuyler, Tazewell, Clinton, Crawford, Effingham, Jefferson, Johnson, Madison, Monroe, Pope, Pulaski, Richland, St. Clair, Union, Washington, White and Williamson.

Wire-worms also did some damage to wheat in Randolph county.

RYE.

The area seeded to rye this fall was 7 per cent. smaller than the 1899 area, the deficiency in northern Illinois being 7 per cent., in central Illinois 9 per cent. and in the southern division 5 per cent.

The area seeded in the northern division was 80,643 acres, in the central division 15,886 acres, and in the southern division of the State 4,500 acres, a total area of 101,029 acres.

The December 1st, condition of the crop is a full seasonable average, being 3 per cent above an average in the northern division, 3 per cent. below in the southern division, and a full average in central Illinois.

CORN.

It is twenty-two years since so large an area of corn was planted in Illinois as in 1900, and twenty-one since the yield and value of the crop have been as large as this year.

According to the assessors' returns 8,050,553 acres were planted last spring, an increase over 1899 of over a million acres. In northern Illinois 3,191,667 acres were planted, in central Illinois 3,480,589 acres, and in the southern division of the State 1,378,297 acres.

The average yield per acre was 38 bushels, the northern division of the State reporting 40 bushels per acre, and the central division 41, while but 24 bushels was reported in the southern division of the State.

The total yield of 305,207,391 bushels has been exceeded but once in the history of the State, in 1879. The yield in northern Illinois was 123,094,344 bushels, in central Illinois 143,343,096 bushels, and in the southern division 33,769,451 bushels.

The average price per bushel, 31 cents, was a little higher than usual, and was very even throughout the State, the total value of the crop amounting to \$96,402,721. In 1864 and in 1879 alone has the corn crop of the State proved more remunerative to the producer.

While there has been considerable complaint of soft and moldy corn, the quality is reported as 93 per cent. of an average, which is by no means a bad showing.

There was comparatively little damage done to corn from insects this season, chinch bugs particularly being conspicuous by their absence. In Knox county corn was somewhat injured by corn louse and ear worms, and in Mercer corn was injured by worms.

Chinch bugs did some damage to corn in Christian, Jersey, Schuyler and Tazewell counties.

In Edgar county there seems to be a tendency towards shallow cultivation of corn.

CROP REPORT.

5

The area, yield and value of the corn crop of the State for the past forty-one years is given in the following table:

YEAR.	Number of Acres.	Average yield per acre.	Bushels Produced.	Price per bushel—cents.	Total Value.	Value per acre.	Cost of production.	Total cost of production.	Profit.	Loss.
1860..	3,839,159	30	115,174,770	42½	\$48,944,277	\$12 74	\$10 50	\$40,311,169	\$8,633,108

BROOM-CORN.

A slightly larger area than in 1895 was planted in broom-corn this year, 24,590 acres being reported. Central Illinois is still the principal producer of this crop, the other divisions of the State devoting to it but 885 and 835 acres. The average yield per acre was a scant one-third of a ton, the total yield being 14,502,000 pounds or 7,251 tons.

The phenomenally high price received in 1899 could not be kept up, and this year the price dropped over 50 per cent., the growers receiving but \$79 per ton for their crop. The total value of the crop at this price was \$575,732.

The following table gives the area, yield and value of the broom-corn crop of Illinois since 1876:

YEAR.	Acreage.	Av. yield per acre— lbs.	Total yield lbs.	Price per ton.	Value of crop.
1877.....	14,566	458	6,674,747	\$71 20	\$237,594

1900.....	24,590	589	14,502,000	79 00	575,732

SORGHUM.

Almost exactly the same area was devoted to sorghum in 1900 as in 1899, there being an increase of only 10 acres. In northern Illinois there was 594 acres, in central Illinois 2,781 acres and in the southern division of the State 6,451 acres.

The yield per acre of 92 gallons is a good deal above the average, making the total yield of 903,369 gallons the largest since 1889. A little better price was realized than for a number of years past, 34 cents per gallon, the total value of the crop at this price being \$309,127.

CROP REPORT.

7

The following table gives the area, yield and value of the sorghum crops produced in the State since 1876:

YEAR.	Acreage.	Av yield per acre— gallons.	Total number of gallons.	Price per gallon.	Value of crop.
1877.....	19,335	63	1,237,164	\$0 42	\$515,409

1900.....	9,826	92	903,369	34	309,127

BUCKWHEAT.

Even less buckwheat was reported in Illinois this year than last, the total area being but 2,412 acres.

Sixteen bushels per acre was raised, yielding a total of 39,972 bushels. The average price of the crop was 61 cents per bushel, it bringing 67 cents per bushel in the northern and southern divisions of the State, but only 48 cents in central Illinois. The total value of the crop at the ruling prices December 1st was \$24,402.

The following table gives the area, yield and value of the buckwheat crop in this State for the past twenty-four years:

YEAR.	Acreage.	Av. yield per acre.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	15,880	13	207,693	\$0 73	\$151,612
1878.....	16,060	9	155,340	1 33	206,608

TIMOTHY SEED.

Quite a large deficiency is noted in the amount of timothy seed produced in Illinois this year, when compared with previous years, but 103,401 bushels being reported. In northern Illinois 54,307 bushels were raised, in central Illinois 18,455 and in the southern division of the State 20,639 bushels.

The average price December 1st, of \$1.85 per bushel, is higher than for several years past, the total value of the crop amounting to \$188,831.

The following table gives the amount and value of the crop in this State since and including 1877:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	483,571	\$1 25	\$604,464
1878.....	261,559	1 25	326,949

CLOVER SEED.

While a little better crop of clover seed was produced this year than in 1899, the crop is not nearly up to the normal. The 1900 crop amounted to 52,992 bushels, which, at the average price of \$4.90 per bushel, returned to the producer \$260,660.

In the following table will be found the yield and value of the crop of clover seed for 1900, as compared with the twenty-three years preceding:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877	64,686	\$4 80	\$310,493
1878	77,388	4 05	313,421

HUNGARIAN AND MILLET SEED.

While the crop of Hungarian and millet seed, 60,649 bushels, is somewhat smaller than last year, the increase in price of 3 cents per bushel brings the value of the crop nearly up to the 1899 mark. The average price received was 62 cents per bushel, the value of the crop being \$37,770.

The following gives the yield and value of this crop since 1876:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877...	17,463	\$0 65	\$10,701
1878.....	26,787	55	14,733
1879.....	43,776	75	32,832

1900.....	60,649	62	37,770

BEANS.

During the last two years there has been very little change in the area devoted to beans in this State, 1,566 acres being reported in 1900, of which 1,035 acres were in southern Illinois.

The average yield per acre was 13 bushels, the total out-put being 21,007 bushels. The average price of \$1.90 per bushel is the highest that has been received for a number of years, and the total value of the crop, \$39,431, is the greatest since 1891.

The following table gives the area, yield and value of the 1900 crop of beans, together with those of twenty-three years preceding:

YEAR.	Acreage.	Av. yield per acre—bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	1,545	13	19,955	\$1 50	\$29,916

CASTOR BEANS.

The same area as in 1899 was devoted to castor beans this year, 7,435 acres, southern Illinois reporting 7,265 acres. Only 6 bushels per acre were produced, the total yield being 45,154 bushels.

At the average price December 1st, of \$1.20 per bushel, this crop was worth to the producer \$54,860.

In the following table is given the area, yield and value of the last twenty-four crops of castor beans:

YEAR.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	4,503	3¼	17,538	\$1 10	\$18,512
1878.....	371	7	2,526	1 25	3,157

TOBACCO.

The area devoted to this crop in 1900 was 4,474 acres, principally situated in southern Illinois.

The yield per acre 601 pounds, was not up to the average, the total yield amounting to but 2,689,306 pounds.

An average price of 7 cents per pound was received, making the total value of the crop \$197,125.

The following table gives the area, yield and value of the crop in this State since 1876:

YEAR.	Acreage.	Av. yield per acre— pounds.	Pounds produced.	Price per pound.	Value of crop.
1877.....	12,320	640	7,885,586	\$0 08	\$638,848

PASTURES.

The area of pasture land has not changed materially for a number of years, the 1900 area being given as 4,857,961 acres. Almost half, 2,456,729 acres, is situated in northern Illinois, central Illinois having 1,808,259 acres and the southern division of the State 592,973.

The average value of pasturage this year was \$3.55 per acre, giving a valuation of \$17,236,227.

The following table gives the area and value of pastures for twenty-four years past:

YEAR.	Acreage.	Value per acre.	Value of crop.
1877.....	4,367,603	\$3 38	\$14,764,112
1878.....	3,983,450	3 10	12,324,657

VEGETABLES.

IRISH POTATOES.

Nearly five thousand more acres were planted to Irish potatoes in Illinois this year than in 1899, 97,266 acres being reported. In northern Illinois there were 45,019 acres and in southern Illinois 32,580, while there were but 19,667 acres in the central division of the State.

The largest average yield per acre was in the southern division, 110 bushels per acre being raised. In northern Illinois the average yield was 85 bushels, and in the central division of the State 98 bushels, the State average being 96 bushels.

The total yield of 9,347,230 bushels is the largest yield since 1895.

The December 1st, price of 39 cents per bushel is not up to the average, but if the entire crop had been sold at that price it would have returned to the producer \$3,615,696.

Potatoes were injured by bugs in Knox county, and in Macon they were badly eaten by white grubs, the ground being full of them.

The following table gives the area, yield and value of the Irish potato crops of the State since 1859:

YEAR.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

SWEET POTATOES.

Except in the southern grand division of the State, but few sweet potatoes are raised, 2,311 of the 3,326 acres reported in 1900, being in that section.

The average yield was 90 bushels an acre, and the total yield 300,570 bushels.

At the ruling price December 1st, of 72 cents per bushel, this crop was worth \$216,984.

The following table gives the area, yield and value of the sweet potato crop of the State for the past twenty-four years:

YEAR.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	2,355	63	148,270	\$0 85	\$126,092
1878.....	1,729	67	116,944	85	99,402

1900.....	3,326	90	300,570	72	216,984

TURNIPS AND OTHER ROOT CROPS.

So much larger area is reported as devoted to turnips and other root crops this year than last, that the value of the crop appears very small, and suggests an error somewhere. It is impossible for this Department to correct so great an error as this, so the figures are given as reported.

The area reported is 4,181 acres, and the value of these crops \$86,649, giving an average value of \$21 per acre. The average yield of turnips per acre was 120 bushels.

In some sections of the State, sugar beets are obtaining favor among the farmers. Tazewell county has probably paid more attention to this crop than any other county in the State, with such encouraging results that double the area of 1899 was seen this year.

The following table gives the acreage and value of turnips and other root crops grown in the State during the past twenty-four years:

YEAR.	Acreage.	Value per acre.	Value of crop.
1877.....	7,056	\$39 55	\$279,136
1878.....	3,775	40 85	154,140
1879.....	3,139	230 15	722,444
1880.....	2,300	45 85	105,414

1900.....	4,181	21 00	86,649

OTHER CROPS NOT NAMED.

There are a number of crops raised in this State which are cultivated only in limited localities and are not of enough importance to be tabulated alone, but are of considerable value to producers.

Such small crops are included under this caption, and a table giving their value in each county in the State is published elsewhere in this report.

Among these crops, cow peas have come into favor in southern Illinois of late years, and the area devoted to them increases each year. The counties making favorable mention of this crop this year are, Fayette, Johnson, Massac, Union and Williamson. In Johnson county worms damaged the pea hay.

The value of these miscellaneous crops in 1900 was \$201,066, of which \$181,413 should be credited to northern Illinois \$7,891 to central Illinois and \$11,762 to the southern division of the State.

FRUIT.

APPLES.

But 962,489 bushels of apples were reported as raised in Illinois in 1900, of which 302,438 bushels were produced in the northern division of the State, 168,122 bushels in the central division, and 491,934 in the southern division.

The December 1st, price of 89 cents per bushel was a little above the average, and had the entire crop been sold at this price, it would have brought in \$865,356.

In Douglas county the apple crop was seriously injured by worms, which caused the fruit to fall.

Spraying apple trees has been successful this year in Marion and Williamson counties.

The following table gives the number of bushels of apples and the value of the crops since 1876:

YEAR.	Bushels. produced.	Price per bushel.	Value of crop.
1877	5,395,351	\$0 80	\$4,316,281
1878	4,940,811	65	3,211,527
1879	5,858,690	75	4,469,017
1880	10,342,186	56	5,791,624
1881	2,659,529	1 22	3,244,625
1882	6,557,128	80	5,245,702

1899	968,726	52	507,033
1900	962,489	89	865,856

PEACHES.

An encouraging increase in the production of peaches is noted this year, 148,797 bushels being reported, almost all of which were the product of southern Illinois.

The average price received was 70 cents per bushel, making the value of the crop \$104,836.

The following table gives the quantity and value of the peaches produced in the State during the past twenty-four years:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877	402,587	\$0 92	\$370,280
1878	607,292	62	376,521
1879	25,740	1 34	34,503
1880	398,970	80	219,176
1881	96,507	1 55	149,586
1882	319,911	83	265,526

1898	213,392	59	125,496
1899	29,586	95	28,064
1900	148,797	70	104,836

PEARS.

A greater number of pears were reported in the State in 1900, than for the two preceding years, and as with peaches they are almost all raised in the southern division of the State. The 1900 product amounts to 11,336 bushels, with a total valuation of \$9,079, an average price of 80 cents per bushel.

The following table gives the extent and value of the pear crop of the State since and including 1877:

YEAR.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	16,318	\$1 35	\$22,704
1878.....	13,510	1 25	16,887
1879.....	6,134	1 55	9,508

1899.....	8,910	94	8,426
1900.....	11,336	80	9,079

GRAPES.

Fewer grapes were raised in Illinois in 1900 than for two years past, but 1,270,828 pounds being reported. At the average price of 2 cents per pound they were worth \$23,867.

CROP REPORT.

19

The following table gives particulars concerning the grape crop of the State for the past twenty-four years:

YEAR.	Pounds produced.	Price per pound.	Value of crop.
1877	3,002,748	\$0 03	\$92,782
1878	1,322,686	03	57,679
1879	3,174,952	03	95,548
1880	7,833,011	03	234,991

1899	1,425,023	02	28,752
1900	1,270,828	02	23,867

WINE.

With a slightly larger area in vineyards than last year, the yield of wine is more than twice as large, 151,949 gallons being reported, an average yield of 127 gallons per acre. Central Illinois produced the greater part of the wine made, in Hancock county.

The ruling price December 1st, was 82 cents per gallon, making the total valuation \$125,090.

The following table gives the number of gallons of wine and the value thereof during the past twenty-four years:

YEAR.	Acreage.	Av. yield per acre—gallons.	Number of gallons produced.	Price per gallon.	Value of crop
1877	2,612	61	158,944	\$1 20	\$191,933
1878	5,178	27	142,964	1 20	171,557

1897.....	2,252	69 80	157,199
1898.....	1,386	98 45	136,445
1899.....	968	102 70	99,425
1900.....	621	221 17	137,348

STRAWBERRIES.

The strawberry crop was a little more remunerative in 1900 than in 1899, \$43,310 being the value of those sold. It would appear that but few strawberries are raised for market in central Illinois, but \$5,426 being reported sold, while northern Illinois reports \$13,000 and the southern division of the State \$24,884.

WATERMELONS.

In northern Illinois the watermelons sold this year brought in 3 per cent. more than in 1899, the value of those sold being reported as \$24,164. In central Illinois \$16,435 worth was sold, and in the southern division \$5,528, a total return of \$46,127.

BEES AND HONEY.

Although fewer hives of bees were reported in 1900 than for the two preceding years, their number being but 55,101, the yield of honey exceeded that of 1899. Northern Illinois producing 237,111 pounds, central Illinois 88,640 pounds, and the southern division of the State 95,718 pounds.

The December 1st, price of 13 cents was about an average, the total value amounting to \$56,546, of which \$33,358 should be credited to northern Illinois, \$11,332 to the central, and \$11,856 to the southern division.

The following table gives the amount and value of honey produced in this State during the past nine years, together with the number of hives of bees:

YEAR.	Pounds produced.	Price per pound.	Value of product.	Number of hives of bees
1891	821,678	\$0 14	\$112,934	120,252
1892	575,356	14	83,294	81,928
1893	571,836	14	83,181	57,710
1894	542,796	14	76,782	70,113
1895	427,667	13	56,534	50,760
1896	433,043	13	55,900	43,411

LIVE STOCK.

HOGS.

There is a slight increase in the number of hogs assessed this year over 1899, the number reported being 2,829,960. In the northern division of the State there were 1,210,227, in the central division 1,133,979, and in the southern division 480,754. At the equalized value of \$1.07 per head, they were worth \$3,028,057.

The number of fat hogs marketed was 2,348,855, or 83 per cent. of the number assessed, and their average live weight was 225 pounds. The heaviest hogs marketed were in northern Illinois, where their average weight was 243 pounds. In the central division the average weight was 218 pounds and in the southern division 195 pounds.

The total live weight of the hogs marketed during the year was 527,833,094 pounds.

The average price received of \$4.35 per cwt., is the highest since 1894, and varied but little in different sections of the State. At this rate, the total value of the hogs marketed amounted to \$23,066,408, of which amount northern Illinois received \$10,609,820, central Illinois \$9,126,358 and southern Illinois \$3,330,230.

The supply of hogs on hand December 1st, as compared with the same date last year was 88 per cent., and their average value \$4.40 per cwt.

Cholera has been quite prevalent during the past year, its ravages being reported from the counties of Boone, Bureau, Grundy, Henderson, Henry, Jo Daviess, Kendall, La Salle, Lee, Marshall, Mercer, Ogle, Stark, Stephenson, Warren, Whiteside, Will, Winnebago, Woodford, Christian, Douglas, Hancock, Greene, Menard, Morgan, Sangamon, Monroe, Richland and St. Clair.

The following table gives the number of hogs assessed and marketed in 1899, as well as their weight and value, for the last forty-five years:

YEAR.	Assessors' Returns.		Estimated per cent. marketed.	Number fat hogs marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value hogs marketed.
	Number.	Value.						
1856	1,596,903	\$3,375,247	70	1,117,832	262	292,871,984	\$4 75	\$13,911,420

BEEF CATTLE.

Rather more cattle were reported by assessors this year than last, 2,009,598 being returned. Of this number 1,085,050 were in northern Illinois, 658,663 in central Illinois and 265,885 in the southern division of the State. At the equalized value of \$4.92 per head, they were worth to the feeder \$9,887,222.

Twenty-three per cent. of the number assessed, or 462,197, were marketed, their average live weight being 1,125 pounds. In the northern division of the State the average weight of the cattle marketed was 1,115 pounds, in central Illinois 1,205 pounds, and in the southern division but 968 pounds. The total weight of cattle marketed was 520,065,373 pounds.

The average value of the cattle sold during the year was \$4.25, and the total value \$22,089,527, the best returns for this class of live stock since 1884. Over half of this amount, \$11,586,663 should be credited to northern Illinois, \$8,299,791 to central Illinois and \$2,203,073 to southern Illinois.

Pinkeye is reported among cattle in Boone, Kane, La Salle, Ogle, Whiteside, Winnebago and Wayne counties, and blackleg in Mercer, Ogle and Pike, while in Effingham county some cattle have died from eating too much corn in the field.

The following table gives the number, weight and value of the cattle marketed in the State since 1855:

DATE.	Assessor's Returns.		Estimated percent marketed.	Number beef cattle marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Value beef cattle marketed.

The supply of beef cattle on hand December 1, 1900, as compared with 1899 is 91 per cent. in northern Illinois, 88 per cent. in central Illinois and 84 per cent. in the southern division, the State average being 88 per cent. The ruling price for cattle December 1st, was \$4.15 per cwt.

DAIRY COWS.

The number of dairy cows in the State this year is the greatest since 1895, the number reported being 632,415, nearly two-thirds of this number, 408,379 being in northern Illinois, where dairying is one of the principal industries. In central Illinois there were 137,442, and in the southern division 86,594.

The average value per head, \$39, is the greatest ever reported, excepting 1882, 1884 and 1899, when \$41 per head was the value reported. The total value of the dairy cattle of the State is estimated at \$24,426,191.

The following table gives the number and value of the dairy cows kept in Illinois since 1878:

YEAR.	Number.	Av. value per head.	Total value.
1879	571,628	\$31 00	\$17,720,468
1880	613,738	31 00	19,035,878
1881	625,410	31 00	19,387,710
1882	581,578	41 00	23,809,661

SHEEP.

Fewer sheep were reported by assessors this year than last by 41,072, the number returned being 681,275. Of this number 196,828 were in the northern division of the State, 266,386 in the central division and 218,061 in southern Illinois. At the equalized value of 76 cents per head, they were worth \$517,769.

Twenty-two per cent. of the number reported, 149,872, were marketed during the year, their average weight being 103 pounds, and their total live weight 15,443,066 pounds.

The average price received for sheep marketed was \$3.80, giving a total value of \$589,810.

Sheep generally have not been much troubled by disease, but a few cases have been reported. Stomach worms caused the death of a good many lambs in Douglas county, and sheep are dying from the same cause in Shelby county. In Crawford county sheep and lambs have been affected with black scours.

The supply of sheep on hand December 1st, as compared with the same date last year was 92, and their market price on the same date was \$3.65 per cwt.

The following table gives the number, weight and value of the sheep marketed in the State since 1855:

YEAR.	Assessors' Returns.		Estimated per cent. marketed.	Number fat sheep marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Value sheep marketed.

WOOL.

The amount of wool shorn this year, 2,435,121 pounds, was the largest clip since 1895. Of this amount 960,791 pounds were sheared in northern Illinois, 894,877 pounds in central Illinois and 579,453 pounds in the southern division of the State. The average price of 20 cents per pound was higher than usual, so that the receipts to the farmer from this source were above the average, being \$483,135. The northern division of the State should be credited with \$191,114 of this amount, the central division with \$175,093, and southern Illinois with \$116,928.

The following table gives the number of pounds shorn, the price per pound, and the total value of the wool clip for the last twenty-four years:

YEAR.	Number pounds shorn.	Price per pound.	Total value.
1877	3,291,677	\$0 30	\$987,503
1878	2,891,087	25	722,752
1879	3,994,558	35	1,380,595

1900	2,435,121	20	483,135

HORSES.

An encouraging increase is shown in the number of horses reported by assessors this year, the number, 942,630, being 27,307 more than was reported for 1899. Of this number 374,269 were in northern Illinois, 367,830 in central Illinois and 200,561 in the southern division of the State.

There were 30,453 colts foaled in the northern grand division in 1899, 30,311 in the central division, and 14,283 in southern Illinois.

The equalized value of horses in 1900 was \$9.06, making their total value \$8,540,309.

There was some lung fever among horses in Knox county, and pinkeye was reported from the counties of Whiteside, Winnebago, Christian and Morgan. Distemper has prevailed to some extent in Clark and Madison counties, and in Johnson a great many horses have died from some unknown cause. In Union county the deaths of many horses have been ascribed to eating pea hay.

The following table gives the number of horses assessed in the State since 1855, and their equalized valuation, as well as the number of colts foaled each year since 1873:

YEAR.	Assessors' Returns.		Number colts foaled.
	Number.	Value.

DAIRY PRODUCTS.

MILK.

The amount of milk sold in 1900 was much larger than last year, being 123,516,667 gallons, most of which. 115,525,024 gallons, was sold in northern Illinois. But 1,261,757 gallons were reported from central Illinois and 3,729,886 gallons in the central division of the State.

The average price received, 13 cents per gallon, was a little above the average of the past ten years, the total value of the product being \$16,119,030.

The following table gives the amount, price and value of the milk sold in the State the last twenty-four years:

YEAR.	Gallons sold.	Price per gallon.	Total value.
1877.....	17,124,506	\$0 11 1-6	\$1,912,236
1878.....	30,567,415	10½	3,209,579

1899.....	99,300,132	12	12,213,168
1900.....	123,516,667	13	16,119,030

CREAM.

More cream was sold in the State last year by 353,616 gallons than in 1899, there being 1,204,679 gallons reported. As with all other dairy products, much the greater portion was in northern Illinois, 740,907 gallons being sold there, 382,564 gallons in central Illinois and 81,208 gallons in the southern division of the State.

The ruling price December 1st, of 56 cents per gallon was not up to the average, the value of this commodity amounting to but \$678,006.

The quantity and value of the cream sold in the State since 1876 is given in the following table:

YEAR.	Gallons sold.	Price per gallon.	Total value.
1877.....	2,744,259	\$0 55	\$1,509,342
1878.....	62,707	52	32,608

BUTTER.

But little variation is to be noted in the quantity of butter sold in the State from year to year. In northern Illinois 10,300,906 pounds were sold, 3,143,391 pounds in central Illinois and 1,534,590 pounds in the southern division of the State, the total output for the State being 14,987,887 pounds.

The ruling price of butter December 1st, was 20 cents per pound, which would make the value of all the butter sold \$3,073,146.

In the following table will be found the quantity and value of the butter sold in Illinois during the past twenty-four years:

YEAR.	Pounds sold.	Price per pound.	Total value.
1877.....	18,970,227	\$0 20	\$3,794,045
1878.....	17,997,652	15	2,699,648

1900.....	14,987,887	20	3,073,146

CHEESE.

Quite a large deficiency is reported in the quantity of cheese sold in 1900, but 762,010 pounds being reported. Almost all of this, 629,259 pounds, was sold in the northern division of the State, central Illinois reporting but 88,127 pounds and southern Illinois 44,624 pounds.

The average price of 15 cents per pound has never been exceeded and has been equalled but once, in 1881. Had all of the cheese sold during the year brought this price, it would have returned to the dairyman \$113,807.

The following table shows the quantity and value of the cheese sold in the State since 1876:

YEAR.	Pounds sold.	Price per pound.	Total value.
1877.....	4,502,671	\$0 12	\$540,320
1878.....	5,139,914	10	513,691

1900.....	762,010	15	113,807

Tables published elsewhere in this report give by counties the quantity and value of the dairy products of the State for 1900.

GENERAL FARM NOTES.

In McHenry county some farmers have tried small patches of rape for sheep and hogs, with varying results. So far this plant has not passed beyond the experimental stage in Illinois.

In Douglas county two or three dredge ditches have been opened, giving better drainage, and in Hamilton and White counties a drainage district has been formed which will open a great deal of rich swamp land to cultivation.

SUMMARY.

The following table gives in small space the value of the principal farm products and live stock of Illinois for the year 1900:

Corn.....	\$96,402,721
Winter wheat.....	14,169,119
Spring wheat.....	863,283
Oats.....	33,016,444
Rye.....	865,118
Barley.....	257,731
Buckwheat.....	24,402
Hay.....	27,316,014
Timothy seed.....	188,831
Clover seed.....	260,660
Hungarian and millet seed.....	37,770
Irish potatoes.....	3,615,396
Sweet potatoes.....	216,934
Turnips and other root crops.....	86,649
Broom-corn.....	575,732
Sorghum.....	309,127
Beans.....	39,481
Castor beans.....	54,860
Tobacco.....	197,125
Other crops not named.....	201,066
Apples.....	865,356
Peaches.....	104,836
Pears.....	9,079
Grapes.....	23,867
Strawberries.....	43,310
Watermelons.....	46,127
Other fruits and berries.....	137,348
Wine.....	125,090
Honey.....	56,546
Horses (equalized value).....	8,540,309
Reef cattle (equalized value).....	3,387,222
Dairy cows.....	24,426,191
Hogs (equalized value).....	3,028,057
Sheep (equalized value).....	517,769
Wool.....	483,135
Milk sold.....	16,119,630
Cream sold.....	678,006
Butter sold.....	3,073,146
Cheese sold.....	113,807
Poultry sold.....	1,313,290
Eggs sold.....	1,038,875
Total.....	\$249,332,139

AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent., is recorded 110; a decrease of five per cent. is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years, will be found to closely approximate the assessors' returns.

W. C. GARRARD,
Secretary.

CORN.

* If the crop had been sold at prevailing prices December 1, it would have returned this amount to the producer.

NAMES AND POSTOFFICE ADDRESSES

—OF—

CROP CORRESPONDENTS

STATE BOARD OF AGRICULTURE,

FOR THE YEAR 1900,

WITH DATE OF APPOINTMENT.

ADAMS COUNTY—

- 1877, A. R. Wallace, Camp Point.
- 1879, G. W. Dean, Adams.
- 1883, H. C. Cupp, Fall Creek.
- 1888, C. H. Rankin, Fall Creek.

ALEXANDER COUNTY—

- 1882, S. H. Yates, Willard.

BOND COUNTY—

- 1882, W. D. Henry, Beaver Creek.
- 1884, E. L. Willford, Old Ripley.
- 1885, J. B. Denny, Sorrento.
- 1885, W. H. Taylor, Tamalco.
- 1898, L. E. Alexander, Reno.

BOONE COUNTY—

- 1877, George Reed, Belvidere.
- 1877, S. C. Fox, Belvidere.
- 1885, Stanley T. Heath, Capron.
- 1899, O. S. Cohoon, Belvidere.
- 1900, Ralston Bros., Caledonia.

BROWN COUNTY—

- 1889, W. B. Rigg, Mt. Sterling.
- 1889, Jos. W. Curry, Mt. Sterling.
- 1889, C. J. Davis, Mound.

BUREAU COUNTY—

- 1877, James F. Mallett, Milo.
- 1885, R. B. Frary, LaMoille.
- 1897, O. W. Mason, Buda.

CALHOUN COUNTY—

- 1881, M. A. Kamp, Kampsville.
- 1891, Isaac S. Berry, Batehtown.

CARROLL COUNTY—

- 1882, John Cole, Thompson.
- 1897, Wm. E. Nipe, Mt. Carroll.
- 1899, Henry Daehler, Chadwick.
- 1899, Joseph R. Ross, Mt. Carroll.
- 1899, Jacob Grossman, Lanark.

CASS COUNTY—

- 1878, John Beggs, Ashland.
- 1896, W. W. Matthew, Newmansville.
- 1900, James Abbott, Chandlerville.

CHAMPAIGN COUNTY—

- 1877, W. A. Conkey, Homer.
- 1885, W. E. Dawley, Seymour.
- 1888, W. H. Morgan, Tolono.

CHRISTIAN COUNTY—

- 1877, J. B. White, Morrisonville.
- 1877, John W. Hunter, Owaneco.
- 1877, A. B. Herdman, Morrisonville.
- 1878, O. S. Nash, Sharpsburg.
- 1897, Basil Hill, Edinburg.
- 1900, Chas. F. Hunter, Tower Hill.

CLARK COUNTY—

- 1877, James B. Sheapley, Martinsville.
- 1877, F. B. Ennis, Dolson.
- 1877, R. R. Scott, Casey.
- 1880, L. B. Anderson, Darwin.
- 1880, Jerry Ishler, Martinsville.
- 1900, Fred Shaw, Darwin.

CLAY COUNTY—

- 1880, Theron Gould, Bible Grove.
- 1891, Edgar Hayes, Iola.
- 1895, John H. Waespe, Clay City.
- 1897, W. S. Bothwell, Clay City.

CLINTON COUNTY—

- 1887, W. H. H. Nichols, Carlyle.
- 1890, John B. Helmann, Damiansville.

COLES COUNTY—

- 1884, Wm. A. Poorman, Humboldt.

COOK COUNTY—

- 1879, C. L. Sweet, Glenwood.
- 1880, Elbert Wheeler, Arlington Heights.

CRAWFORD COUNTY—

- 1877, William L. Heustis, Robinson.
- 1882, William Wood, Oblong.
- 1897, W. M. Hart, Annapolis.
- 1900, Clinton Newlin, Hutsonville.
- 1900, D. H. Newlin, Hutsonville.

CUMBERLAND COUNTY—

- 1882, Jas. M. Albin, Neoga.
- 1887, David B. Green, Toledo.
- 1891, J. L. Mattoon, Greenup.

DeKALB COUNTY—

- 1881, Edwin Waite, Sycamore.
- 1884, Robt. Hampton, East Paw Paw.
- 1890, John King, Courtland.

DeWITT COUNTY—

- 1882, W. R. Carle, Wapella.
- 1897, W. H. Ogleyee, Clinton.
- 1898, C. E. Robb, Clinton.

DOUGLAS COUNTY—

- 1887, William Iles, Camargo.
- 1891, J. F. Bouck, Arcola.
- 1892, Perry N. Howe, Ficklin.
- 1897, J. S. Campbell, Murdock.
- 1900, Edward Grimsley, Hayes.
- 1900, W. E. Bouck, Arcola.

DuPAGE COUNTY—

- 1885, Thomas Betts, Jr., Naperville.
- 1899, M. L. Lester, Wooddale.

EDGAR COUNTY—

- 1885, Morris Little, Edgar.
- 1892, C. D. Smith, Grandview.

EDWARDS COUNTY—

- 1877, W. A. Shelby, Maple Grove.
- 1888, John H. Marshall, Grayville.
- 1889, Ira Gould, Bone Gap.

EFFINGHAM COUNTY—

- 1883, George W. Strong, Winterrowd.
- 1883, T. J. Dunn, Elliottstown.
- 1885, William Blakeley, Altamont.
